

OUTDOOR INSTALLATIONS

The Symmetry Xtra Tall Bespoke Series electric fireplaces are suitable for installation on an inside wall in an outdoor area protected from direct water impingement. In addition to maintaining the listed mantel and combustibles clearances, a rain protection overhang factor of 1/2 shall be constructed to the front and to each side of the installed appliance. See illustration below. All wiring connections to line power shall be in accordance with local building code requirements. Inquires about local codes and regulations must be done prior to installation.

The overhang(A) must extend at least 1/2 the roof-line height. Height is measured from the base of the fireplace.

For example: if the roof-line(B) is 8" above the base of the fireplace, the overhang(A) must be at least 4".
