

Rushmore Clean-Face Direct-Vent Fireplace
WITH TRUFLAME TECHNOLOGY

Rushmore

RUSHMORE CLEAN-FACE Direct-Vent Fireplace

Available in 36-inch and 40-inch models, the Rushmore features a dual burner that creates a tall lively fire, accented with a massive 14-piece log set and large glowing ember bed. The huge ceramic glass front allows heat to easily transfer in to your living space and provides a clear view of the fire.

While the Rushmore is a visually stunning fireplace, what you can't see makes it even more impressive. TruFlame Technology - featuring a ceramic catalyst - minimizes emissions while maximizing heat efficiency. This results in the most realistic flames, reminiscent of a wood burning fire.

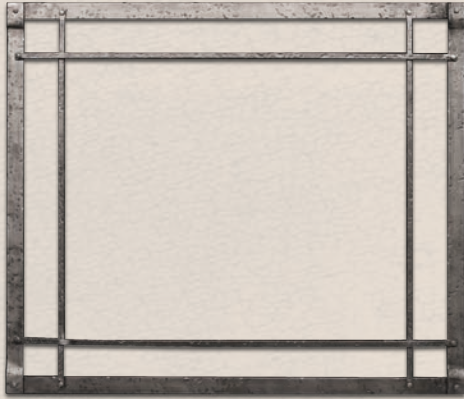

An external air control eliminates the guesswork during setup and allows your dealer to fine tune the flame, ensuring a beautiful fire.

Rushmore 40-inch Clean-Face Fireplace with Rustic Brick Liner, Decorative Front in Forged Iron with Arch Insert, and built-in Accent Lighting

INSPIRING VERSATILITY

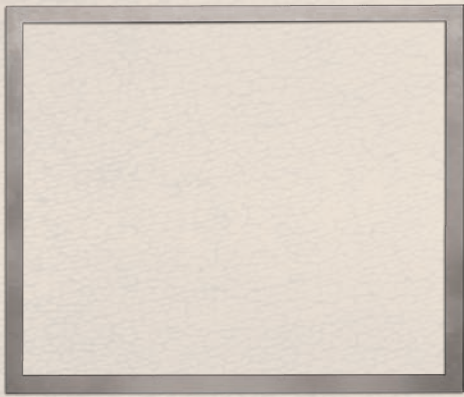

An attractive clean-face design integrates the barrier screen flush with the fireplace front – allowing you to install tile, brick, or other non-combustible materials right up to the fireplace opening for a clean installation. Choose one of the optional decorative fronts, doors, or frames to tailor your new fireplace with the look that suits your décor. Add the available hand-forged andirons to complete the look. The optional whisper-quiet double blower distributes warmth throughout the room.

INTUITIVE CONTROL

Your TruFlame fireplace includes an easy-to-use thermostat remote to control the burners, the built-in accent lighting, and the optional double blowers. Simple, on-screen icons let you manually vary the flame height, light intensity, and blower speed (if installed).

Or select from two thermostat modes - Conventional and Smart. In conventional mode, the fireplace operates automatically (on high) to quickly warm your room to the desired temperature. In Smart mode, the remote continuously compares the room temperature to the thermostat setting and then varies the burner height and speed of the dual blower to maintain the desired temperature with minimal variation.
