

Large Sets

Vented Gas Logs

Hargrove's Large Sets feature many styles of massive logs for large fireplace applications. Designed in combination with our Double-Stack and Triple-Stack burner systems, and were 2008 Vesta Award Finalists.

Kodiak Char Double Stack

Kodiak Char Double Stack weaves huge charred logs and colorful split pieces into a beautiful fire that will fill the largest fireplace. The Double-Stack burner system allows for elevated flame in the upper areas of the log set.

- Available in 24"-60" sizes
- Massive Charred logs
- Natural Gas
- Liquid Propane in 24", 30", & 36"

Kodiak Split Double Stack

Kodiak Split Double Stack offers exceptionally large and detailed split logs with deep textured bark for an outstanding fresh cut look.

- Available in 24"-60" sizes
- Massive Split logs
- Natural Gas

Kodiak Timbers Double Stack

Kodiak Timbers Double Stack is made from ceramic fiber and will glow with the heat of the flames. Our revolutionary fiber molding process retains all the detail of our refractory logs.

- Available in 18"-36" sizes
- Detailed glowing logs
- Natural Gas and Liquid Propane

Kodiak Char Triple Stack

Kodiak Char Triple Stack features additional logs on our Triple-Stack burner system, which allows for an impressively large stack of logs.

- Available in 24"-60" sizes
- 3rd Burner for larger & deeper flames
- Natural Gas
- Liquid Propane in 30" & 36"

Mountain Timber

Mountain Timber has a unique paint scheme and gnarled log shapes that create a distinct likeness of high country timber by utilizing a new paint process and our time-tested craftsmanship.

- Available in 30"-60" sizes
- Large, rounded logs
- Natural Gas only

Summit Oak

Summit Oak features a huge stack of fresh cut oak logs and the Summit burner system which provides the beauty of our large sets in either Natural gas or Liquid propane.

- Available in 36"-48" sizes
- Majestic oak elegance
- Natural Gas and Liquid Propane

Burners

Double Stack Burner - Uses a large ember bed and an elevated main burner. It is designed to work with both Kodiak log sets or as a foundation for custom designed log sets.

Triple Stack Burner - A third burner added to the rear of the Double Stack burner system for increased height, more mass, and greater depth of flame that will easily fill the largest fireplaces. Offered in both styles of Kodiak series logs.

Ember Supreme Burner - Uses an oversized single burner design to produce taller flame patterns.

Summit Burner - A deep, three-level pedestal grate with a combination pan and tube burner design. The largest burner available that is capable of burning in Natural Gas and Liquid Propane applications.
