Mason-Lite Accessories

- Masonry Chimney
- Masonry Arch
- Mason-Lite Rumford Height Kit
- Masonry Firebrick Panels
- Damper Blocks
- Metal Base Kit
- High Temperature Mortar

Masonry Chimney

This Masonry Chimney has an inner liner section with a 14" diameter flue and an outer liner section that must be ordered together to function properly. We also offer both 4' and 8' systems. Other chimney components offered are the Inner Liner Starter Section, the Offset Elbow Section, and Brick Ledge.

Masonry Arch

This Masonry Arch Kit consists of two pieces that are easily mortared in place to give that custom look to the fireplace.

Mason-Lite Rumford Height Kit

This Height Kit consists of a rear wall and two side walls that will increase the height of the opening by 8" from the standard opening (giving a Rumford look). With the new size opening, be sure to check the Chimney Size Chart to ensure proper flue size.

Masonry Firebrick Panels

Masonry Firebrick Panels are easy to install and are available in split herringbone, split running bond and full running bond. The set has two sides, a back and a bottom. We also offer a taller kit to fit the Rumford style fireplaces. Standard installation time is under an hour.

Damper Blocks

Mason-Lite Damper Blocks are a 3-piece set of masonry block that is designed to lift a traditional vestal damper so that it fits our standard Masonry Fireplaces.

Metal Base Kit

The Metal Base Kit - complete with brackets and cement board - is used for installations on combustible floors and second story applications. Be sure to follow instructions for Hearth Rebar Locations to ensure proper installation.

High Temperature Mortar

Each standard Firebox Kit comes with a 50lb. bucket of dry mortar. Each kit comes with enough mortar to install the firebox itself. If you're installing one of our brick panel kits or other masonry accessories, you may need to purchase more.

Ask about our additional accessories!
