

# LOAD BEARING VEST AUSTRALIA

## HOW TO CLEAN YOUR STAB VEST!

### HAND WASH ONLY

Put 3 or 4 drops of "Comfort type fabric cleaner" in water and dip the vest in the water for approximately 3 to 5 minutes depending on how soiled your vest is.

### DO NOT USE HOT WATER

Only Use normal temperature tap water.  
Dry vest in the shade (not under direct sun light) We recommend hanging your vest , however you can lay it flat on a towel and turn the vest a few times while in the drying stage.

### ALWAYS REMOVE THE STAB PANELS BEFORE WASHING
