

HAPPY BEAR

Washable diapers  
and accessories

Comfortable for your baby,  
easy to use and good for  
the future.

## Why washable diapers?

With washable diapers you can save up to 1000 euros over the entire diaper period, they are good for the environment and children are on average toilet trained a year earlier. The diapers from HappyBear are a one-time investment and pay for themselves. Are washable diapers dirty? Not at all, the stools are collected in the inserts and can easily be disposed of during diaper changes.

## Good for your baby

With HappyBear diapers your child has less chance of allergic reactions because of the natural materials. The nappies are made from cotton, bamboo and hemp. The soft inside and absorbent lining make the diapers feel wonderful for your baby's skin. The HappyBear diapers have the most beautiful unique prints.

Together  
we can  
change  
the world

## About HappyBear

HappyBear diapers are durable, easy to use and comfortable for your baby. We put you and your baby first. With our sustainable materials and natural products, we strive for a better future.

More and more parents choose HappyBear Diapers and with that our impact gets bigger, or better said: smaller! How nice would it be if washable diapers are the new normal in a world where we take care of the environment and nature?

HappyBear ensures that the washable diapers does not cost more than necessary. You do not pay the price for sustainability. But with our washable diapers you do contribute to a better world for your child and those of future generations.

"We believe sustainability is very important and want to offer people an environmentally friendly alternative to disposable diapers. Our own developed All-in-one diapers are a good example of this. They can be used from birth to potty training. And after that, they can also be used for future brothers or sisters."

Jeffrey Scholten & Ramon van Groesen  
Founders

## Products en accessories

As a brand, we think it is important to provide parents and babies with all the comforts. That is why we have developed complementary products alongside the washable diapers. Hydrophilic cloths, washable swim diapers, wetbags and much more. These are made of the finest quality fabrics and match with each other. How nice is that!

## Our diapers

HappyBear currently has three different sorts of diapers systems. All three have been developed to make it as easy and comfortable as possible for you and your baby. The nappies can be used from birth to potty training. They have double leakage gutters so the chance of leaks is very small. ## All-In-One diaper

The All-In-One diaper is the most recently developed diaper from HappyBear. Thanks to the Velcro closure, this washable diaper is just as handy as a disposable diaper. But so much better for the environment! The velvet lining is extremely soft and has excellent absorbency in combination with the double bamboo booster.

## Pastel prints - Velcro

## Pocket diaper

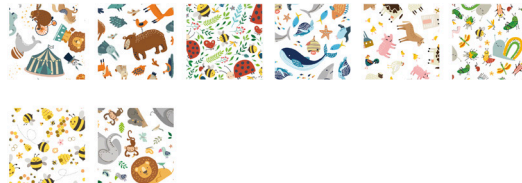

The pocket diaper is a diaper with a waterproof but breathable outer layer that keeps baby's bottom dry for longer. The soft interior has a double pocket opening into which the boosters can be slipped. Boosters are needed for extra absorption and can be combined with each other. How many and which boosters you use is up to you, depending on how much your child pees. The pocket diapers always comes with a microfibre and bamboo booster.

## Two part diaper

The name says it all, this system consists of two parts: the bamboo diaper and a diaper cover. The soft bamboo diaper has an excellent absorption, but is not waterproof. It is therefore important to put diapers around the innerdiaper to make it leak proof. The bamboo diaper is made from 100% soft bamboo terry fabric and has a slim fit.

### Pastel prints - Snaps

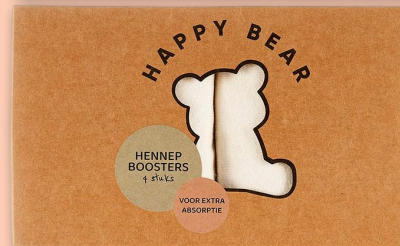

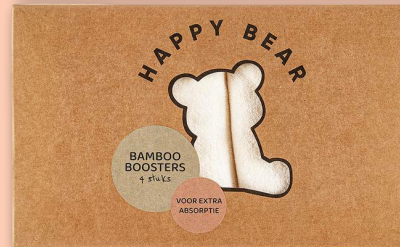

### Animal prints - Velcro

The bamboo diaper has a velcro closure.

## Boosters

Boosters are often used for pocket diapers or extra absorption in other diapers. There are four types of boosters made of different fabrics. The four boosters in order of absorbency: microfiber, charcoal, bamboo and hen-fake. You can combine them as you like, but HappyBear recommends using a fast-absorbing booster with a well-absorbing booster. Then place the fastest absorbing one on top. Make sure that the microfibre or charcoal boosters never come into direct contact with the bottom. These two boosters extract moisture and therefore there is a risk of skin irritation.

## Inserts

The HappyBear bamboo insert sheets are ideal for catching stools in the washable diapers. The inserts feel soft and comfortable for your baby. You place a single insert in the diaper and easily throw it away after use. There are 100 liners on a roll.

Say goodbye to  
the clumsy,  
thick and  
expensive suits  
with disposable  
swim diapers!

## Swimdiaper

Going on holiday, to the sea or just the little pool in the garden? In principle, you only need one swimming diaper, because unlike disposable diapers, HappyBear's swimming diapers can be washed and used again. And that all summer long! For convenience it can be useful to buy a second swimming diaper.

Did you know that a disposable swimming diaper cannot absorb any pee at all? That would make your baby very heavy when swimming. Even with the washable swimming diaper, urine runs through the diaper and is broken down by the chlorine in the pool water. This makes the washable swimming diaper nice and light and allows your baby to move around freely.

## Wetbag

Where do you keep the used (swimming) diapers? The wetbag is waterproof and suitable to store wet or used stuff. The two separate zipped compartments make it easy to keep your things separated.

The handy loop ensures that the wetbag can be hung up anywhere.

## Pastel prints

## Animal prints

Which print will you go for?

## Swaddle or hydrophilic cloth

Hydrophilic cloths are a must-have for every parent. You can use the extra large hydrophilic towels of HappyBear as swaddle cloth, blanket, baby blanket, changing mat, towel and much more. You can't have enough of them!

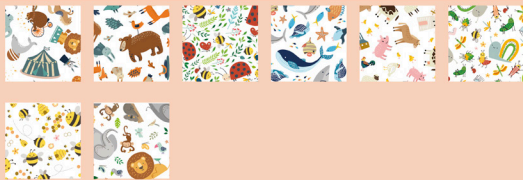

## Trainingpants

Is your child almost potty-trained, but do accidents still happen occasionally? HappyBear potty training pants with cheerful prints make potty training fun.

### Pastel prints

### Animal prints

On average,  
children are  
potty-trained  
one year  
earlier.

## Changing mat

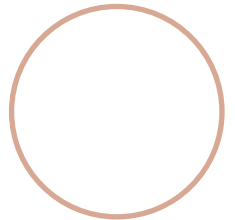

The changing mat is ideal for home and travel, thanks to its compact size and light weight. Your baby will always lie on a clean, soft and beautiful surface while being changed!

Thanks to the waterproof layer with a beautiful print, accidents during changing are no problem.

## Pastel prints

Easy for you,  
Good for your baby!

## The benefits of washable diapers!

- ✓ Washable nappies are better for the environment!
- ✓ You save up to €1000 per diaper period, because you only buy washable diapers once.
- ✓ With bamboo, cotton and hemp, your baby is less likely to develop allergic reactions.
- ✓ You save 260 kilos of waste per year!
