

## Daytona Seat Installation Yamaha YXZ 2016+

Driver

Parts List

Passenger

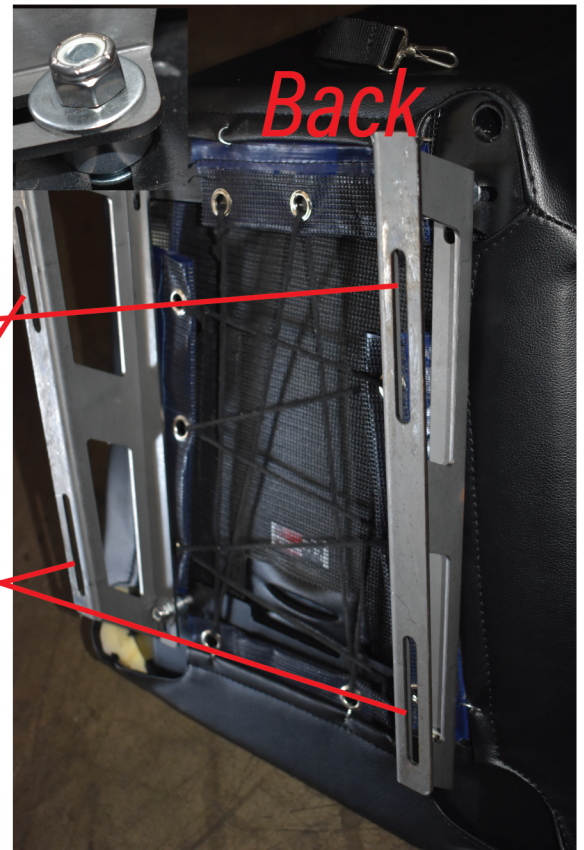

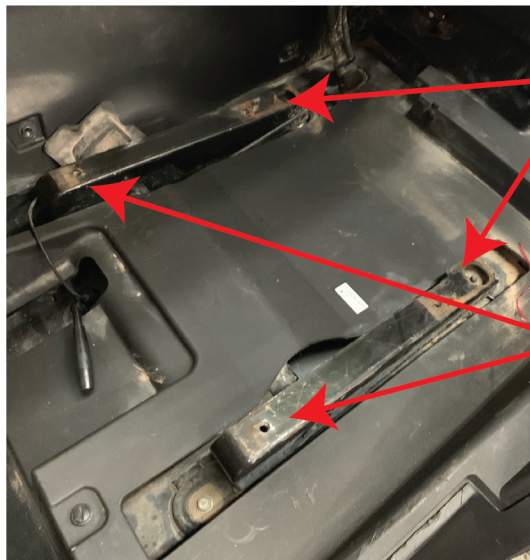

Step 1: Remove stock seats

### Driver Side

1. Use part C and B to mount included brackets to your new seat. You can either measure the distance on the stock seat, or you can leave part C loose until the seat is mounted on to your YXZ. Make sure to tighten them after.

2. Use part A to mount brackets to the Driver side of the YXZ.

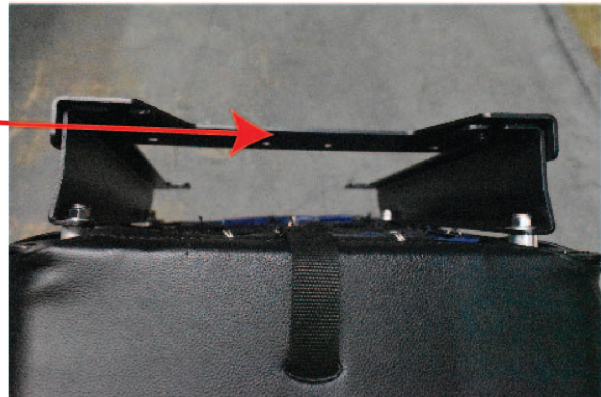

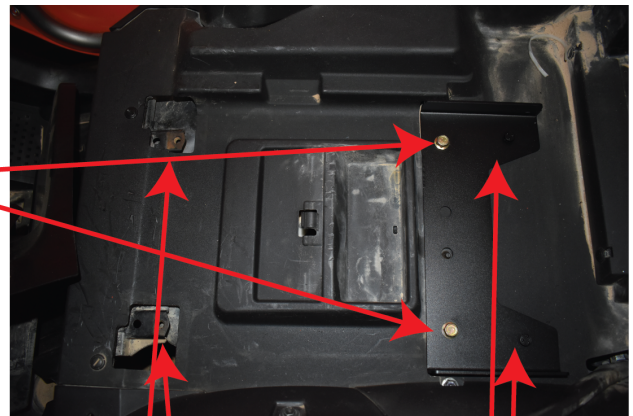

*Daytona Seat Installation  
Yamaha YXZ 2016+*

*Passenger Side*

*1. Mount the included brackets with parts D and B. Tip: Use the included bracket to measure the correct distance to mount the seats.*

*2. Mount the included bracket to your YXZ using part A.*

*3. You can now slide your seat into the bracket and bolt down the front using part A*
