Last or Next Song	Click the 2 buttons on the left or right respectively
Volume UP/DOWN	Long press the right button to increase volume, left button to decrease volume

# Bluetooth Pairing

Take the earcuffs out of the case. Turn on bluetooth on your device and search for new device “AM-TW01” to connect.

## Bluetooth Connected

Open the case and take out earcuffs they will be automatically connected to the last bluetooth device.

## Bluetooth Disconnected

Remove earcuffs from ears and put them back in case then close it for disconnection. Earcuffs will automatically disconnect when you are more than 10m away from the device. Get in range (10m) of the device to reconnect within 1 minute.

# Charging Instruction

If your earcuffs arrive with low batteries, It may be due to the long shipping process. But not to worry, First pay attention to the indicators provided. Here's how to interpret them:

## Case & Earcuffs Flashing

If both the charging case and the earcuffs themselves are flashing, this indicates that they are fully charged and ready for use.

If you notice that one earcuff is flashing while the other is not, it suggests that the earcuff which is not flashing is not fully charged.

## In This Case

You may need to clean the charging contact with gentle touch and reposition them in the charging case to ensure proper contact with the charging pins.

# Charging Process

Find the USB charging port on your earcuffs. This port is typically located on the back of case.

Take the provided USB Type-C cable and securely connect one end to a compatible power source, such as a USB wall adapter, computer, or power bank. Insert the other end of the USB Type-C cable into the charging port of your earcuffs. Ensure a firm connection is made to initiate the charging process.

## Safety Instruction

Please observe the following precautions to avoid product damage.

1. Please do not put the product in back pocket to avoid squeezing, deformation or other faults when sitting down.
2. Please do not use the aircraft in the aircraft cabin. The impact of radiowaves may cause misoperation and accidents.
