	Seven times	Seam standard error

The printer uses Tips:

Note:

1. To ensure the optimal print quality, please use the original factory power adapter.

2. Please avoid to use the poor quality label which wear the printer and cause damage to the printer.

3. Please clean the print head regularly to ensure the high-quality print effect.

4. When replacing the label specification (including the label thickness, size and quality), please do "Automatic label identification".

5. If the label quality is good and printer head has been cleaned, print effect still can't meet the requirment, please adjust the print density, the range from 0 to 15 levels.

6. The printer has paper absorption function, please load label directly from the paper inlet. If open the cover to place the label, the label should be over the paper outlet a little (length less than one label) to avoid waste.
