## GSK3a-pY279 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human protein-serine/threonine kinase GSK3a

# KINEXUS

Address: 8755 Ash Street, Suite 1  
Vancouver, British Columbia,  
Canada V6P 6T3

### Target Protein

<b>Name Long:</b>	Glycogen synthase-serine kinase 3 alpha
<b>Alias:</b>	DKFZp686D0638; Factor A; Glycogen synthase kinase 3 alpha; GSK-3 alpha; GSK3-alpha; Kinase GSK3-alpha
<b>UniProt ID:</b>	P49840
<b>Sequence Predicted Mass (KDa):</b>	50.981 (483 AA; P49840)
<b>Observed SDS-PAGE Mass (KDa):</b>	50-54

### Immunogen

<b>Antibody Immunogen Source:</b>	Human GSK3a sequence peptide Cat. No.: PE-04ACX99
<b>Antibody Immunogen Sequence:</b>	NVS(pY)ICS(bA)C (bA) = beta-alanine
<b>Location in Target:</b>	Corresponds to amino acid residues N276 to S282; In the protein kinase catalytic domain activation T loop region between subdomains VII and VIII.
<b>Peptide Type:</b>	For phosphosite-specific recognition of target.
<b>Target Phosphosite:</b>	Tyr-279

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Ig Isotype Clone Lot:</b>	Immunoglobulin G
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipеп peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
<b>Antibody Amount:</b>	25 µg
<b>Antibody Concentration:</b>	0.3 / 0.5 mg/ml
<b>Lot Number:</b>	141017 / 160121
<b>Storage Buffer:</b>	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerazol
<b>Storage Conditions and Stability:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

### Applications

<b>Product Use:</b>	Western blotting   Antibody microarrays
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human, mouse, rat and many other vertebrates; Phosphosite is highly conserved in diverse species
<b>Detection by Immunoblotting in Cell/Tissue Lysates:</b>	Weak immunoreactivity of a target-sized protein by Western blotting in HeLa cells following phenylarsine oxide and vanadate treatment for 30 min, and weak detection in MCF7 cells.
<b>Overall Antibody Specificity:</b>	Very high selectivity
<b>Antibody Cross Reactivities:</b>	No significant cross-reactive proteins detected in A431, HeLa and MCF7 cells. In SDS-PAGE sample buffer extracted A431 cell lysates, it appears that there may be cross-reactivity with the EGF receptor.

This product is for in vitro research use only and is not intended for use in humans or animals.
