

AB-PK665

IRAK4-pT345+pS346 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human protein-serine/threonine kinase IRAK4

KINEXUS

Address: 8755 Ash Street, Suite 1
Vancouver, British Columbia,

Target Protein

Name Long:	Interleukin 1 receptor-associated kinase 4
Alias:	Interleukin-1 receptor associated kinase 4; IPD1, REN64, NY-REN-64; IRAK-4
UniProt ID:	Q9NWZ3
Sequence Predicted Mass (KDa):	51.530 (460 AA; Q9NWZ3); 37.674 (336 AA; Q9NWZ3-2)
Observed SDS-PAGE Mass (KDa):	53-60

Immunogen

Antibody Immunogen Source:	Human IRAK4 sequence peptide Cat. No.: PE-04ANA99
Antibody Immunogen Sequence:	TVM(pT)(pS)RIV(bA)C (bA) = beta-alanine
Location in Target:	Corresponds to amino acid residues T342 to V349; In the protein kinase catalytic domain activation T loop region between subdomains VII and VIII.
Peptide Type:	For phosphosite-specific recognition of target.
Target Phosphosite:	Thr-345+Ser-346

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
Antibody Amount:	25 µg
Antibody Concentration:	1 mg/ml
Lot Number:	141107
Storage Buffer:	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerasol
Storage Conditions and Stability:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Applications

Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other mammals
Antibody Positive Controls:	Very strong immunoreactivity with immunogen peptide on dot blots.
Detection by Immunoblotting in Cell/Tissue Lysates:	Weak immunoreactivity of a target-sized protein by Western blotting in A431 cells.
Overall Antibody Specificity:	High-very high selectivity
Antibody Cross Reactivities:	No significant cross-reactive proteins detected in Jurkat and A431 cells, exceptfor a ~77 KDa strongly cross-reactive protein detected in A431 cells.

This product is for in vitro research use only and is not intended for use in humans or animals.
