

AB-PK765

PKCb-pS661 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human protein-serine/threonine kinase PKCb (PRKCB1)

Address: 8755 Ash Street, Suite 1
Vancouver, British Columbia,
Canada V6P 6T3

Email: info@kinexus.ca
Phone: 604-323-2547

Target Protein

Name Long:	Protein-serine kinase C beta 1
Alias:	Kinase PKC-beta; KPCB; MGC41878; PKC II; PKC-B; PKC-beta; PKC-II; PRKCB; PRKCB1; PRKCB2; Protein kinase C, beta type
UniProt ID:	P05771
Sequence Predicted Mass (KDa):	77.012 (673 AA; P05771-2); 76.869 (671 AA; P05771)
Observed SDS-PAGE Mass (KDa):	75-85

Immunogen

Antibody Immunogen Source:	Human PKCb (PRKCB1) sequence peptide Cat. No.: PE-04AOV99
Antibody Immunogen Sequence:	AGF(pS)YTN(bA)C (bA) = beta-alanine
Location in Target:	Corresponds to amino acid residues A658 to N664; In Pkinase_C domain near C-terminus of the kinase
Peptide Type:	For phosphosite-specific recognition of target.
Target Phosphosite:	Ser-661

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipеп peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
Antibody Amount:	25 µg
Antibody Concentration:	1 mg/ml
Lot Number:	150305
Storage Buffer:	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerasol
Storage Conditions and Stability:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Phone: 604-323-2547

Applications

Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other vertebrates; Phosphosite is highly conserved in diverse species
Antibody Positive Controls:	Strong immunoreactivity with immunogen peptide on dot blots.

This product is for in vitro research use only and is not intended for use in humans or animals.
