## Syk-pY323 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human protein-tyrosine kinase Syk

# KINEXUS

Address: 8755 Ash Street, Suite 1  
Vancouver, British Columbia,  
Canada V6P 6T3

### Target Protein

<b>Name Long:</b>	Spleen protein-tyrosine kinase
<b>Alias:</b>	DKFZp313N1010; FLJ25043; FLJ37489; Kinase Syk; KSYK; Spleen tyrosine kinase; SYK; CCDS6688.1; ENSG00000165025
<b>UniProt ID:</b>	P43405
<b>Sequence Predicted Mass (kDa):</b>	72.066 (635 AA; P43405); 69.510 (612 AA; P43405-2)
<b>Observed SDS-PAGE Mass (kDa):</b>	67-77

### Immunogen

<b>Antibody Immunogen Source:</b>	Human Syk sequence peptide Cat. No.: PE-04ALE99
<b>Antibody Immunogen Sequence:</b>	FNP(pY)EPE(bA)C (bA) = beta-alanine
<b>Location in Target:</b>	Corresponds to amino acid residues F320 to E326; In the region between the SH2 and kinase catalytic domains. The major site of phosphorylation in Syk.
<b>Peptide Type:</b>	For phosphosite-specific recognition of target.
<b>Target Phosphosite:</b>	Tyr-323

### Production

<b>Antibody Host Species:</b>	Rabbit
<b>Antibody Type:</b>	Polyclonal
<b>Antibody Ig Isotype Clone Lot:</b>	Immunoglobulin G
<b>Production Method:</b>	The immunizing peptide was produced by solid phase synthesis on a multipep peptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
<b>Antibody Amount:</b>	25 µg
<b>Antibody Concentration:</b>	1 mg/ml
<b>Lot Number:</b>	141107
<b>Storage Buffer:</b>	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerasol
<b>Storage Conditions and Stability:</b>	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

### Applications

<b>Product Use:</b>	Western blotting   Antibody microarrays
<b>Antibody Dilution Recommended:</b>	2 µg/ml for immunoblotting
<b>Antibody Species Reactivity:</b>	Human, mouse, rat and many other mammals
<b>Antibody Positive Controls:</b>	Very strong immunoreactivity with immunogen peptide on dot blots.
<b>Detection by Immunoblotting in Cell/Tissue Lysates:</b>	Strong immunoreactivity of a target-sized protein by Western blotting in Jurkat cells.
<b>Overall Antibody Specificity:</b>	Medium-High selectivity
<b>Antibody Cross Reactivities:</b>	Almost no significant cross-reactivities detected in T98G cells and sea star oocytes, but with SDS-PAGE sample buffer extraction in Jurkat and A431 cells, get detection of cross-reactive proteins from 120-140 KDa.

This product is for in vitro research use only and is not intended for use in humans or animals.
