

AB-PN547

PCYT1A-pT342+pS343 Antibody

Phosphosite-specific polyclonal antibody for monitoring the phosphorylation of human PCYT1A; CTPCT; CCTA

KINEXUS

Address: 8755 Ash Street, Suite 1

Target Protein

Name Long:	CTP: phosphocholine cytidyltransferase isoform A
Alias:	CCT A; CCT-alpha; CCTA; Choline-phosphate cytidyltransferase A; CT; CT A; CTA; CTP:phosphocholine cytidyltransferase A; CTPCT; PCY1A; PCYT1; PCYT1A; phosphate cytidyltransferase 1, choline, alpha; Phosphorylcholine transferase A
UniProt ID:	P49585
Sequence Predicted Mass (KDa):	41.731 (367 AA; P49585)
Observed SDS-PAGE Mass (KDa):	40-45

Immunogen

Antibody Immunogen Source:	Human PCYT1A; CTPCT; CCTA sequence peptide Cat. No.: PE-04ARG95
Antibody Immunogen Sequence:	FSGK(pT)(pS)PP(bA)C (bA) = beta-alanine
Location in Target:	Corresponds to amino acid residues F338 to C346; Near the C-terminus of the protein. These are among the main in vivo phosphorylation sites in PCYT1A.
Peptide Type:	For phosphosite-specific recognition of target.
Target Phosphosite:	Thr-342+Ser-343

Production

Antibody Host Species:	Rabbit
Antibody Type:	Polyclonal
Antibody Ig Isotype Clone Lot:	Immunoglobulin G
Production Method:	The immunizing peptide was produced by solid phase synthesis on a multipепptide synthesizer and purified by reverse-phase hplc chromatography. Purity was assessed by analytical hplc and the amino acid sequence confirmed by mass spectrometry analysis. This peptide was coupled to KLH prior to immunization into rabbits. New Zealand White rabbits were subcutaneously injected with KLH-coupled immunizing peptide every 4 weeks for 4 months. The sera from each animal was applied onto an agarose column to which the immunogen peptide was thio-linked. Antibody was eluted from the column with 0.1 M glycine, pH 2.5. Subsequently, the antibody solution was neutralized to pH 7.0 with saturated Tris. This antibody was also subject to negative purification over phosphotyrosine-agarose.
Antibody Amount:	25 µg
Antibody Concentration:	1 mg/ml
Lot Number:	160121
Storage Buffer:	Phosphate buffered saline (PBS) pH7.4, 0.05% Thimerazol
Storage Conditions and Stability:	For long term storage, keep frozen at -40°C or lower. Stock solution can be kept at +4°C for more than 3 months. Avoid repeated freeze-thaw cycles.

Applications

Product Use:	Western blotting Antibody microarrays
Antibody Dilution Recommended:	2 µg/ml for immunoblotting
Antibody Species Reactivity:	Human, mouse, rat and many other mammals
Overall Antibody Specificity:	Very high selectivity
Antibody Cross Reactivities:	No significant cross-reactive proteins detected in phenylarsine oxide (PAO)+vanadate-treated HeLa cells, EGF-treated A431 cells and insulin-treated MCF7 cells, when these cells were homogenized in SDS-PAGE sample buffer.

This product is for in vitro research use only and is not intended for use in humans or animals.
