

FACTS

Number one Skateboard Factory in Europe
19 Years experience skateboard manufacturing
Boards pressed one by one with Hard Rock Maple U.S.A. CNC cutting
Greatest care in raw materials selection
Millions of boards produced for thousands of brands and skateshops over their last decade
High manufacturing experience and skills - nobody knows how to make skateboard decks better than HLC in Europe
Customer care in English | French | Spanish
Products extensively tested by top professional skateboarders
All shapes and constructions developed and tested by own research laboratory
Awarded 9 stars by board / testing "Quality control system unmatched in the industry"
Large shape selection
Boards pressed exclusively for each customer
Worldwide shipping
High production capacity - thousands boards daily
Eco - Friendly - all waste materials recycled since day one
Duty of confidentiality - non disclosure agreement

CONCAVES

We are in constant touch with our customers and team riders who give us their feedback about concaves, shapes and all the sport's trends the shapes HLC Factory offers come in 4 different concaves to answer every skateboarder's demand and to stay ahead of the evolution of the discipline.

Our goal is to offer the widest range possible and cover the diversity of today's skateboarding.

M01
LOW CONCAVE

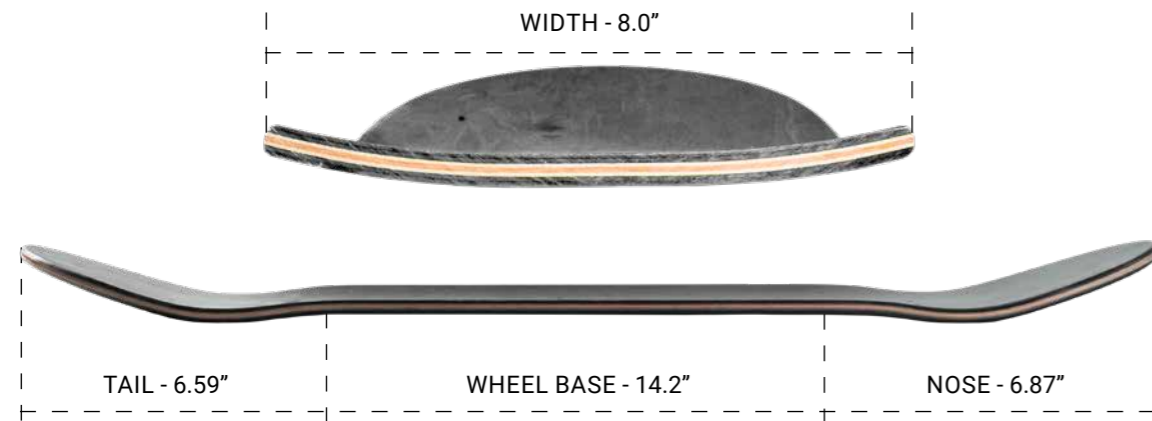

M04
MEDIUM CONCAVE

M02
HIGH CONCAVE

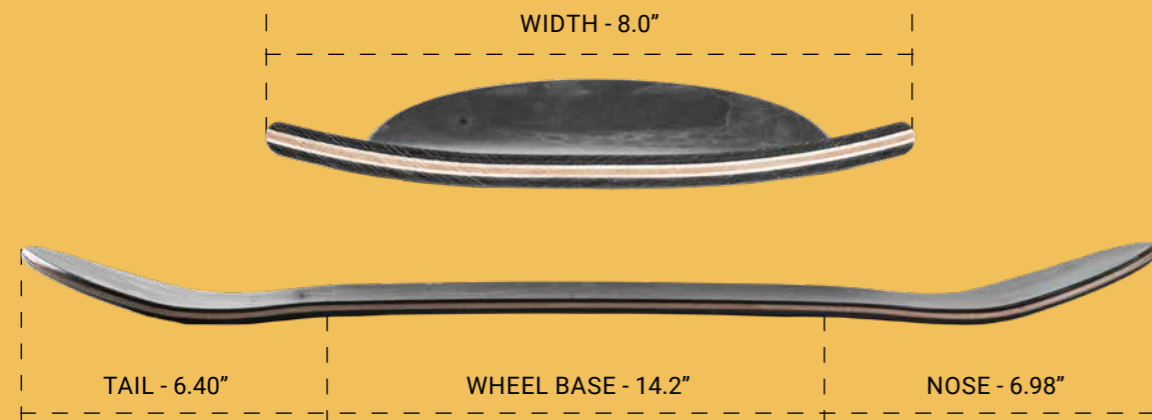

LOW CONCAVE

The low concave is designed for riders who are looking for a smooth board. A quicker pop response, and sweet curves that make the board comfortable in all situation.

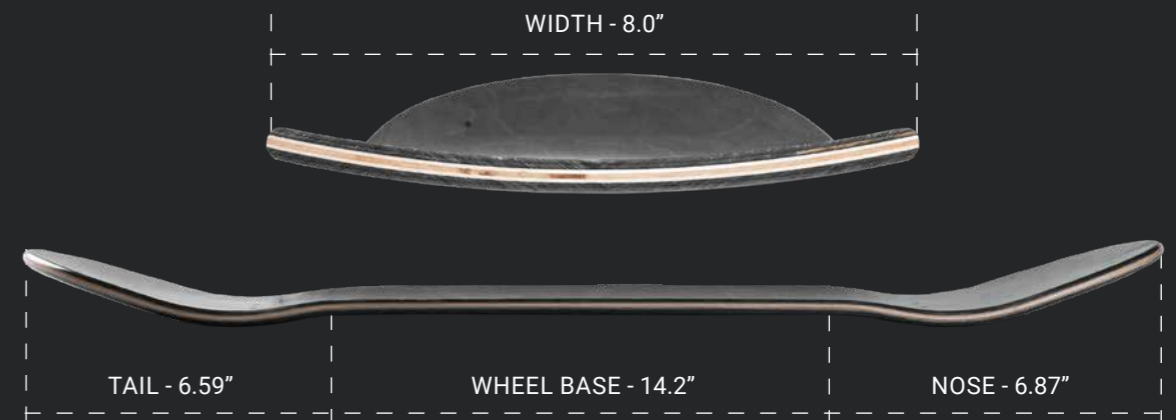

MEDIUM CONCAVE

For those who are looking for a balanced board. The perfect mix between high and low concave.

HIGH CONCAVE

More radical curves and kickers, tested and approved by thousands of riders over the last decades.

POPSICLE

LOW CONCAVE

The popsicle shape is the empirical result of 50 years of evolution in skateboarding.
Featured in low concave.

GRIPTAPE

PRINTING

Printed griptapes are very popular today, and they allow your brand to be visible on a space
that used to be undecorated so far. HLC can print any kind of graphic, logo, image or picture.
2 options at 2 different prices - minilogo / full graphic.

Jessup partnership - we work exclusively with Jessup griptape, the original
griptape who introduced silicone carbide to the skateboard industry in 1975.
Jessup gripped more boards than all the griptape brands combined.

SKATEBOARD WHEELS

A SKATE WHEEL WITH A DIFFERENTIAL VALUE TRULY BASED ON
QUALITY & PERFORMANCE

IN the current skateboarding industry, there are just a few factories that produce hardgoods for all other brands in the market. When we talk about wheel manufacturers, even fewer in relation to the number of brands that sell them.

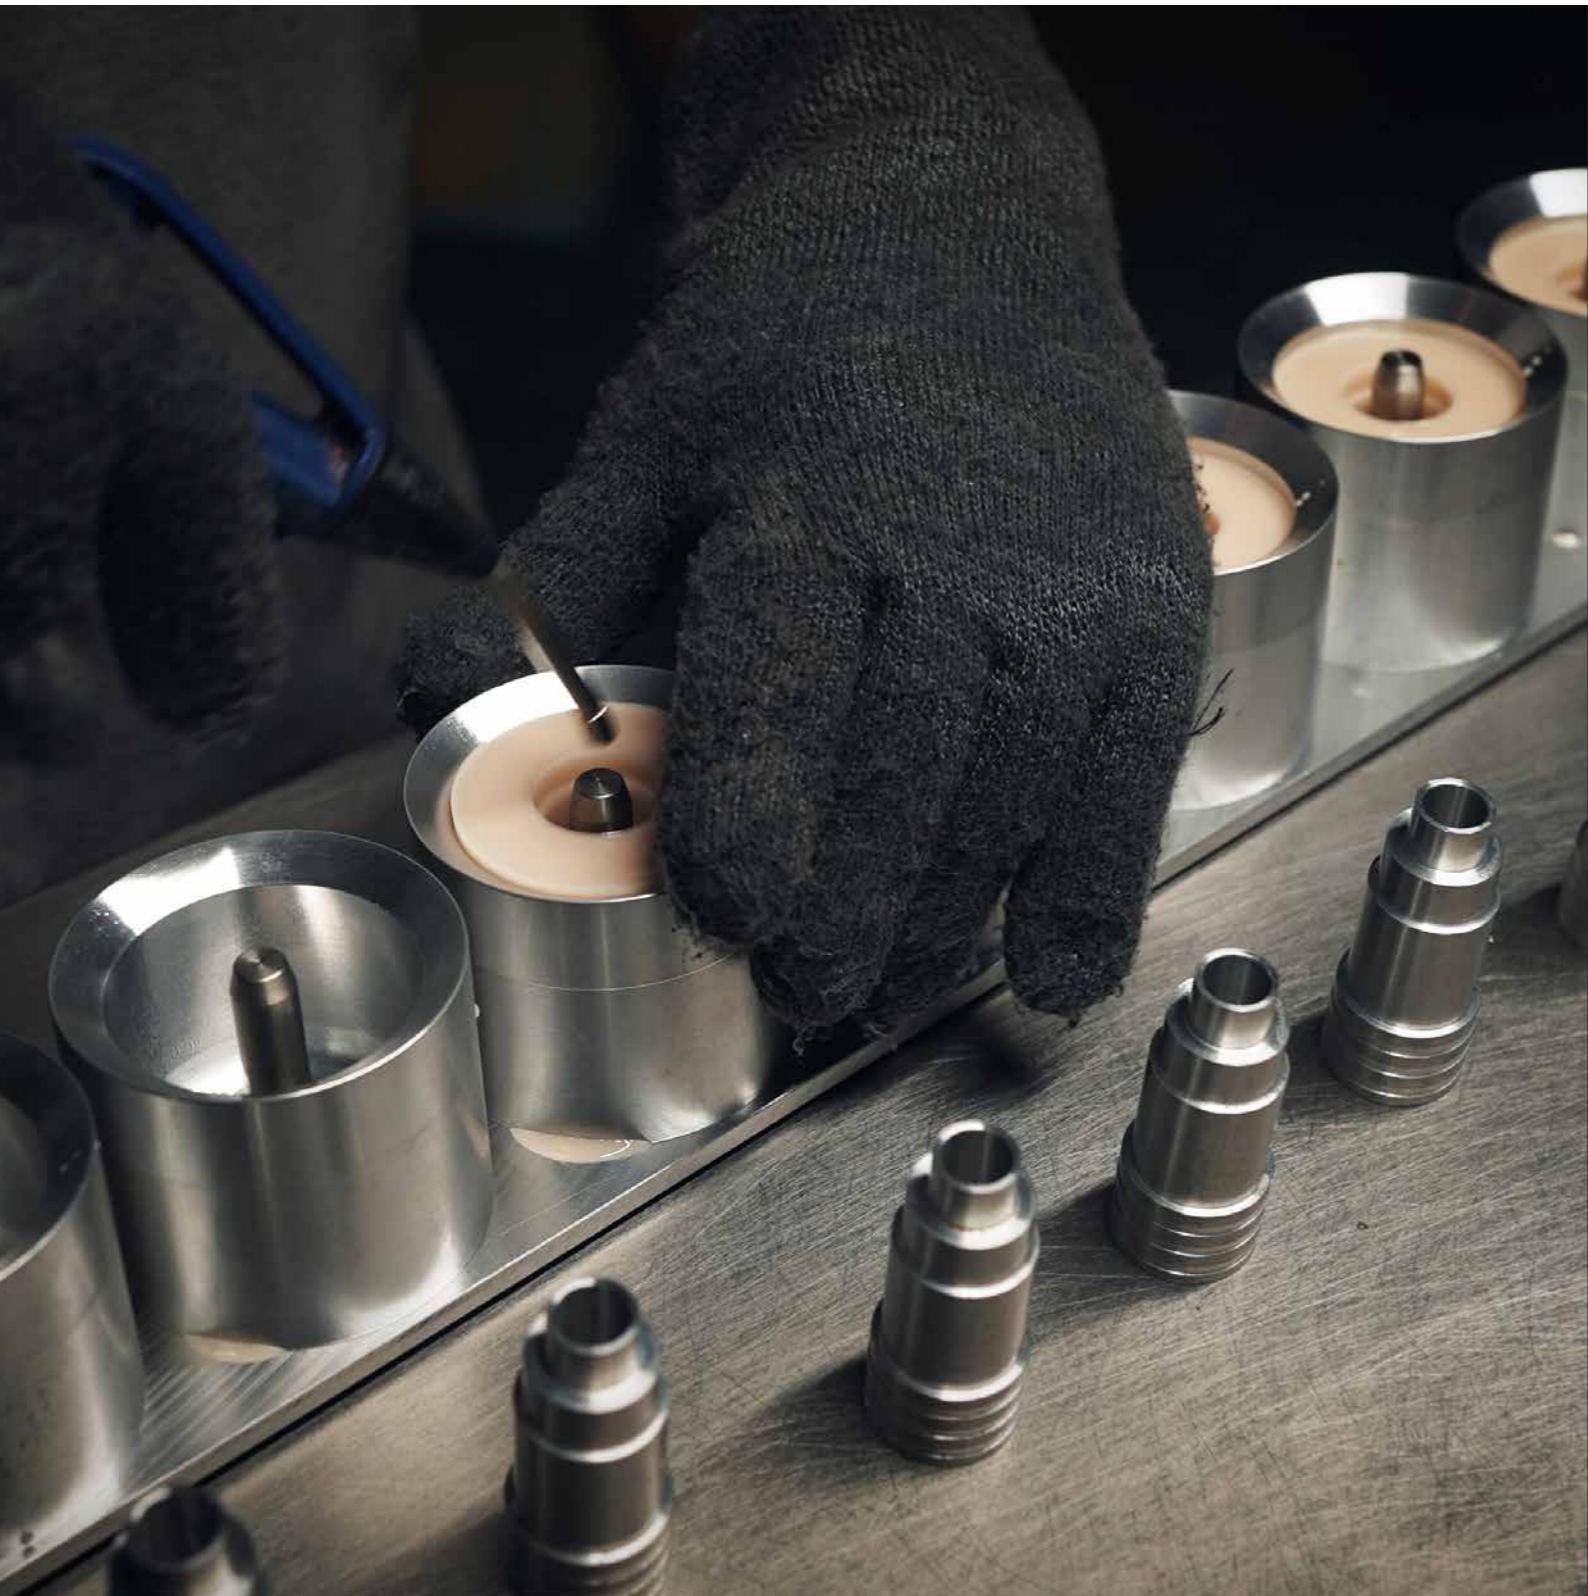

What that means is, the differential value between wheel brands is usually the brand image, marketing strategies and the team they put together.

At HLC, and after almost 4 years of R&D, we are now proud to design and manufacture TOP QUALITY wheels in our own lab.

We are now offering a product with a differential value truly based on quality and performance.

Our wheel formulas are developed uniquely for skateboarding applications, and we will start by presenting two different formulas which are being baked by casting machines in our own lab in Spain (EU). Also, following the European Manufacturing Regulations which guarantees that our formulas have 0% harmful to health ingredients.

Both formulas are made using the best raw materials, resulting in a super high rebound wheel with low abrasion, ensuring a long-lasting product.

OUR TWO NEW FORMULAS

HAVE BEEN DEVELOPED AND IMPROVED SINCE 2018 AND HAVE GONE THROUGH STRICT CURING TIME AND BAKING TEMPERATURE CONTROL, WITH EACH FORMULA BEING PRODUCED IN DIFFERENT CASTING MACHINES.

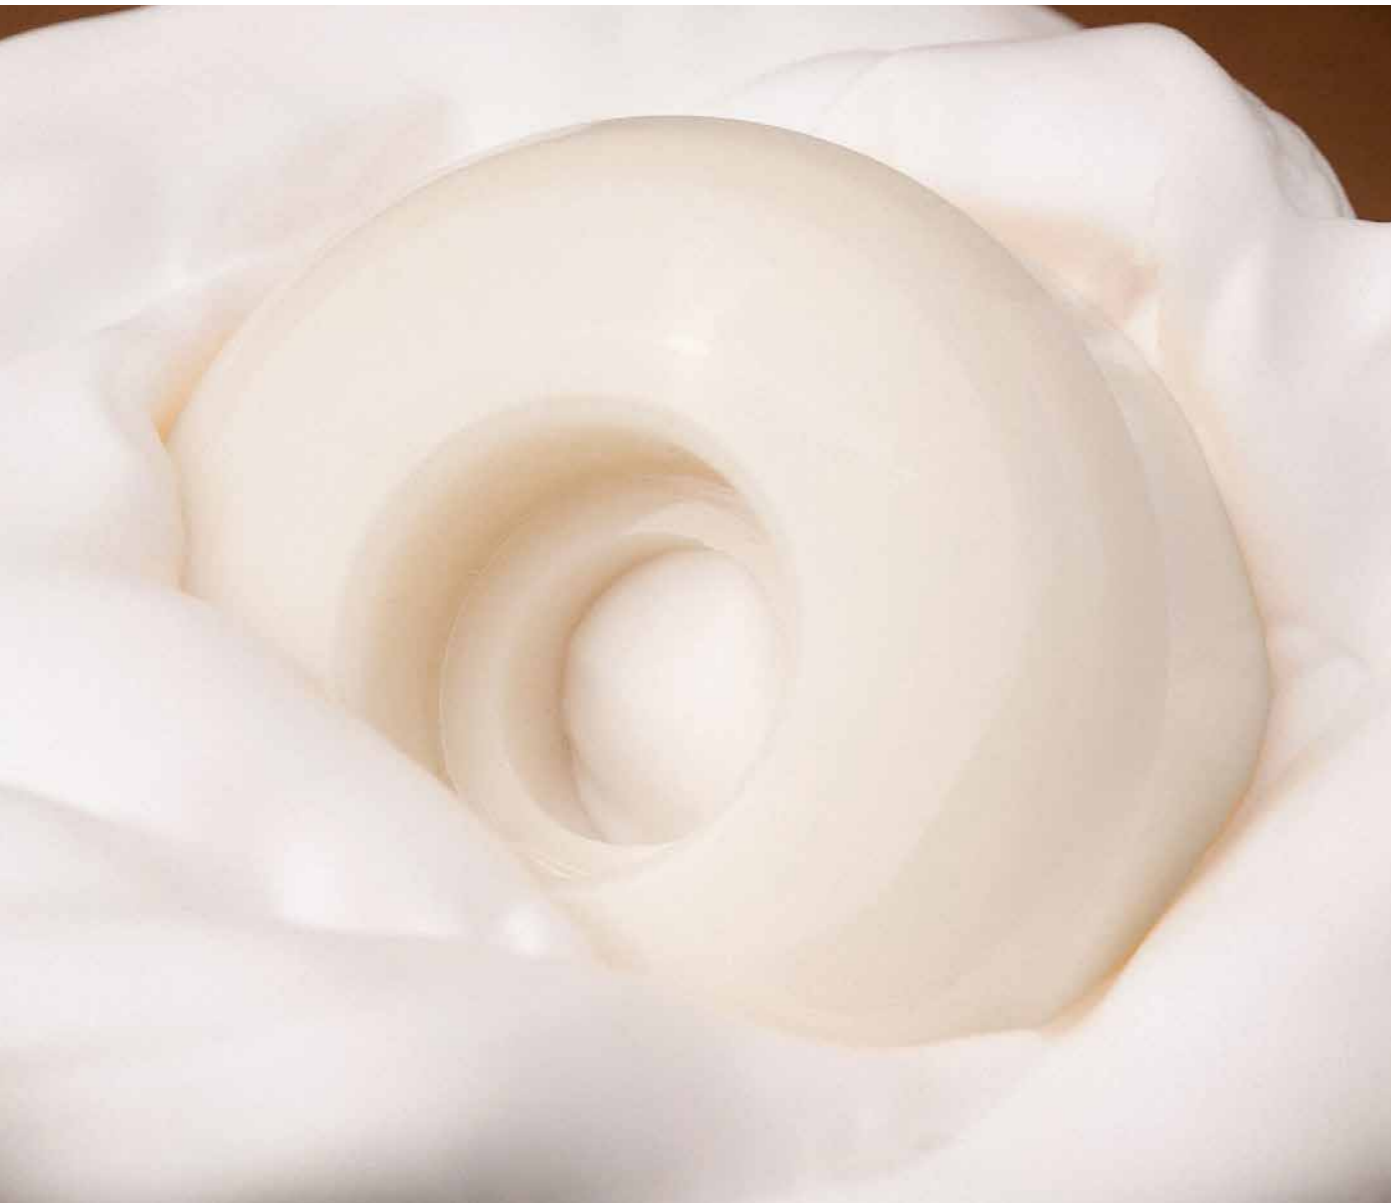

CREAM FORMULA 99A

The Cream Formula is the perfect balance between speed, grip and pop. A formula made with high-quality polyurethane and reaching a 99A duro, it is especially designed for smooth and flat surfaces.

The MDI urethane used for the Cream Formula results in a top-quality wheel, with a high-end finish and low abrasion at a reasonable price.

When the ingredients are meticulously chosen, the mixing is spot on, and the manufacturing process is methodic and patient... the result is just perfect. It's just pure science!

BUTTER FORMULA 98A

The smoothest, most pleasant and durable wheel formula you can get your hands on. Pure butter!

Our high-performance 98A Butter Formula contains a secret ingredient, which is used in the exact proportions to give the wheel an unbeatable quality and finish, with special resistance to flat spots and Super High Rebound.

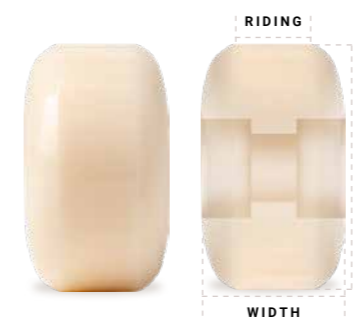

The wheels have a hard feel when touched but softness when skating, allowing you to ride on any surface and cushioning your landings.

With the Butter formula wheels you'll get speed and acceleration when you most need it. You will also get used to their control and grip.

CLASSIC SHAPE

THE CLASSIC SHAPE IS AVAILABLE IN BOTH CREAM AND BUTTER FORMULAS
