

THOMAS & WILSON LIMITED

Specialists in Fibrous Plaster

Est. 1919

Thomas & Wilson

Established 1919

Thomas & Wilson prides itself on being a third-generation family firm specialising in superior quality fibrous plasterwork. Founded in 1919, it is one of the oldest such firms in existence. Housed for many years in a distinctive building, once the workshop and studio of the sculptor and artist Henri Gaudier Brzeska, Thomas & Wilson have recently opened a new dedicated workshop complimented by a fine showroom, itself a testimony to the plastering and moulding skills and heritage of the company.

We have worked on the restoration of many beautiful traditional buildings alongside involvement with modern contemporary buildings where interesting shapes and designs are required.

Our extensive library of mouldings, accumulated over the years, provides a wide range of patterns and styles, the majority of which are detailed in this catalogue (and also at thomasandwilson.com) along with the product references. Our materials produce a high quality cast which remains unaffected by time and weather.

The majority of our mouldings are detailed in this catalogue and at thomasandwilson.com along with product references and measurements.

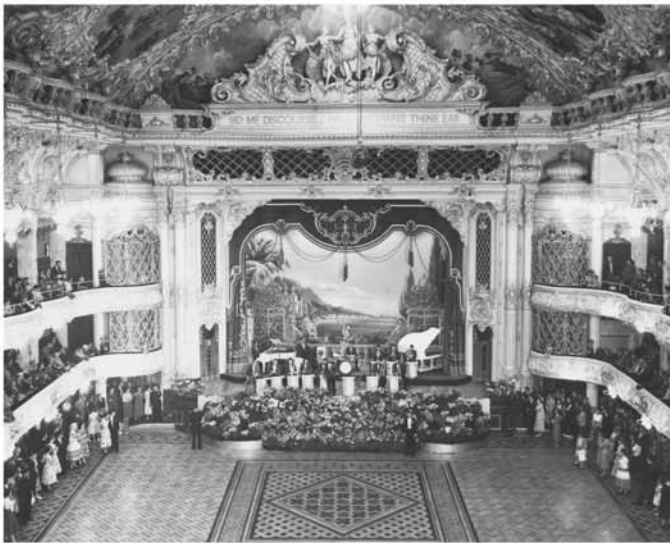

We stock moulds for over 120 different cornices, numerous decorative panel mouldings, wall friezes and ceiling centres, along with corbels, brackets, columns and a wide range of miscellaneous enrichments.

Where external mouldings are required we would recommend glassfibre or glassfibre reinforced cement. These materials produce high quality castings which remain unaffected by time and weather.

We have undertaken work on the following projects

- | | |
|--|------------------------|
| King's College, London | Thistle Tower Hotel |
| West Wycombe House | Ritz Hotel |
| Brooks Club, St. James | Richmond Riverside |
