Physical Hazards/Precautionary Measures:

Keep away from all sources of ignition.

4. First Aid Information

Eye:

If irritation or redness develops from exposure, flush eyes with clean water. If symptoms persist, seek medical attention.

Skin:

First aid is not normally required. However, it is good practice to wash any chemical from the skin.

Inhalation (Breathing):

First aid is not normally required. If breathing difficulties develop, move victim away from source of exposure and into fresh air. Seek immediate medical attention.

Ingestion (Swallowing):

Aspiration hazard; Do not induce vomiting or give anything by mouth because this material can enter the lungs and cause severe lung damage. If victim is drowsy or unconscious and vomiting, place on the left side with the head down. If possible, do not leave victim unattended and observe closely for adequacy of breathing. Seek medical attention.

Notes To Physician:

Acute aspirations of large amounts of oil-laden material may produce a serious aspiration pneumonia. Patients who aspirate these oils should be followed for the development of long-term sequelae. Inhalation exposure to oil mists below current workplace exposure limits is unlikely to cause pulmonary abnormalities.
