

OZARKÉ

INSTRUCTION MANUAL

OZARKÉ

Thank you for shopping with Ozarké, we really appreciate your business. Our goal is to provide an excellent customer service before, during and after delivery. We've included a guide on how to install this light, should you require additional assistance please feel free to email us at info@ozarke.com and one of our customer service reps will reach out to assist you.

Working Principle:

The candle warmer lamp operates by heating the bulb to evenly melt the surface of the fragrance candle and release its aroma. It provides a safer and more convenient alternative to open flames and also serves as a decorative item.

Here are the steps for using the candle warmer lamp:

Step 1: Install the bulb.

Step 2: Place the bottled candle in the groove of the base and turn on the power.

Step 3: Turn on the switch to activate the wax melting lamp.

Protection Grade: IP20

Working Environment: -5°C to 45°C for normal operation

Protection Level Against Electric Shock: Class II

Power: Maximum 35W

Power Supply: 110V/50Hz-220V/60Hz

Pro Tip:

To ensure proper volatilization of the essential oil, it is recommended to heat the candle 2-3 times under the wax melting lamp. After each heating session, pour off a layer of melted oil from the surface of the candle. This will allow the essential oil to continue volatilizing until the wax is completely melted. By following this process, you can optimize the fragrance release from your candle.

Usage Guidelines

Remove the plastic protective bag from the lamp body before use.

Prior to use, please check if the voltage matches and ensure the product is not damaged.

Do not turn on the power supply until the installation of the product is completed. Always cut off the power supply before moving it.

It is important to use a stable voltage. Unstable voltage can shorten the product's lifespan.

Keep the lamp away from curtains, paper, and other flammable materials.

Do not place the lamp on surfaces that are inclined at an angle greater than 6 degrees.

Keep the lamp away from children and pets. Avoid exposing it to direct sunlight and high humidity

Avoid lighting candles simultaneously when using the wax melting lamp to prevent accidents.

The continuous working time of the wax melting lamp should not exceed 4 hours.

Do not touch the bulb and lampshade while the product is in operation or still hot to prevent burns.

Before going to bed, remember to turn off the power supply to avoid prolonged exposure to excessive heat.

Do not handle the plug or adjust the power supply with wet hands to prevent the risk of electric shock.

This product is intended for indoor use only.

Individuals with amblyopia, astigmatism, or children should not stare directly at the product's light source for an extended period.

Maintenance:

Before wiping and cleaning the product, always disconnect the power supply.

Do not use grinding tools or solvents to clean the product.

Regular cleaning and inspection are recommended to prolong the product's service life.

Do not wash the lamp body directly with water.

It is strictly forbidden to disassemble the product for any modifications.
