**INSTRUCTION MANUAL**

# OZARKÉ

Thank you for shopping with Ozarké, we really appreciate your business. Our goal is to provide an excellent customer service before, during and after delivery. We've included a guide on how to install this light, should you require additional assistance please feel free to email us at [info@ozarke.com](mailto:info@ozarke.com) and one of our customer service reps will reach out to assist you.

## **Before you get started:**

When working with electrical wiring, follow these safety instructions to prevent injury or damage:

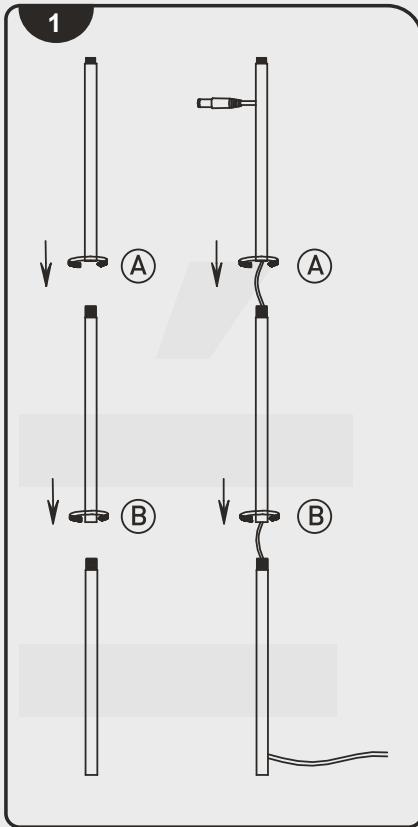

1. Turn off the power: Before starting any work, turn off the power to the area you will be working in.
2. Use appropriate tools: Only use tools designed for electrical work and in good condition.
3. Wear protective gear: Wear safety glasses, gloves, and other protective gear as necessary.
4. Test for power: Use a non-contact voltage tester to check for electrical current before touching any wires.
5. Avoid wet conditions: Do not work with electrical wiring in wet or damp conditions.
6. Keep a safe distance: Stay away from exposed wires or electrical components.
7. Seek professional help: Consult a qualified electrician if you are unsure about any aspect of electrical wiring or encounter any problems.

## **WARNING!**

1. Do not use the power supply beyond the specified range (100-240V,50Hz).
2. Avoid scratching the surface and wires of the lamp during installation.
3. Do not install the lamp outdoors.
4. The lamp should not be close to corrosive chemical objects or gases.  
It should not be washed with water. It can only be wiped with a clean soft cloth.

# Installation Instructions

## Touch Switch

**3 Color Temperature & Stepless Dimming:** In addition to stepless brightness adjustment, the tripod floor lamp has 3 different color temperature settings: Cold White, Natural White, and Warm White (ranging from 3000 K to 5000 K). A single tap will turn the lamp on and set it to Cold White. A second tap will switch it to Natural White, and a third tap will change it to Warm White. With the stepless dimming design, holding down on the touch sensor will gradually adjust the lighting to suit your needs. Once you've set a comfortable brightness level, you're all set.
