

# PROFESSIONAL BEEF PASTURE MIXTURE

- Premium quality components selected for regional adaptation and performance
- Maximum production per acre
- Produces high-quality hay
- Excellent general pasture mixture

Professional Beef Pasture Mixture was created to meet the needs of producers who want to optimize animal performance and maximize per acre return. We start with only the highest quality components which are carefully chosen for their regional adaptability and combined in the proper ratios to assure maximum pasture and hay production. This premium mixture, along with good management practices, will provide you with the best opportunity to optimize the return on your management investment.

## Proprietary Mix Ingredients

### Tall Fescue 40%

- High yielding, endophyte-free variety
- Excellent hay and pasture variety
- Perfect for winter stockpiling
- Very good persistence and drought tolerance

### Orchardgrass 27%

- Increased stand persistence
- Ideal for hay or pasture
- Excellent seedling vigor
- Great palatability

### Intermediate Ryegrass 10%

- Fast establishment
- Vigorous regrowth
- Drought tolerance
- Highly nutritious

### Perennial Ryegrass 10%

- Very palatable
- Good digestibility
- Easy establishment
- Handles intensive grazing

### Timothy 5%

- Early maturity
- Great palatability
- Improved summer regrowth
- Excellent spring vigor
- Superior leafiness
- Very winterhardy

### Red Clover (34% Coated) 4%

- Unmatched forage quality
- Excellent disease resistance
- Superior persistence

### Ladino White Clover (34% Coated) 4%

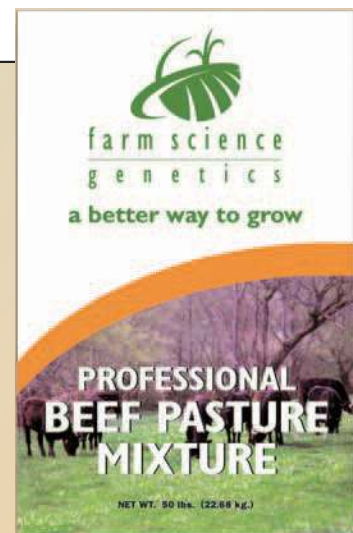

- High-quality feed
- Large leaf clover
- Persistent: survives intense grazing pressure

## Planting Specifications

Seeding rates	20-25 pounds per acre - new seedings 15 pounds per acre - overseeding
