COIL +
DRIFT

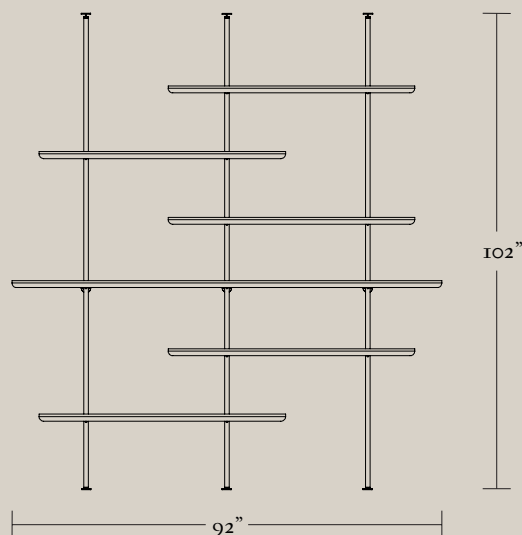

Hover Shelving is a shelving system with a balanced, but asymmetric form. Spanning floor to ceiling, it can be installed against a wall or customized and used as a sculptural room divider. The system is comprised of precision-carved wood shelves that are suspended on vertical metal rods. The shelves rest on adjustable metal pins that pierce through the vertical metal rods. Hover Shelving can be customized to perfectly fit your needs.

DIMENSIONS

102”H x 92”W x 10”D + five 53”W shelves + one 92”W shelf
