BEFORE YOU BEGIN:

+ Determine if you will be installing into a stud or not. If you are not, be sure to pre-drill and add a plastic anchor before you screw in the clasp.

CAUTION:

+ Handle with care, mirror is fragile and can shatter if dropped.

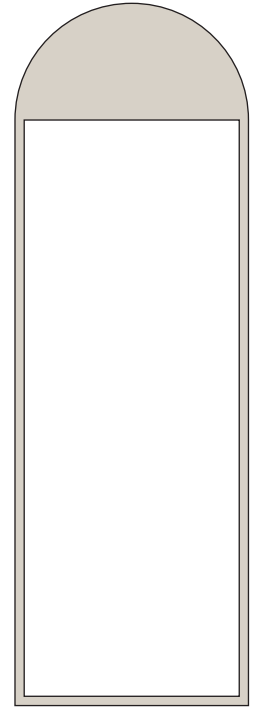

DISCLAIMER:

+ Please note that the June Floor mirror is intended to be hung on a wall. Leaning the mirror against the wall at an angle will result in warping over time.

TOOLS REQUIRED:

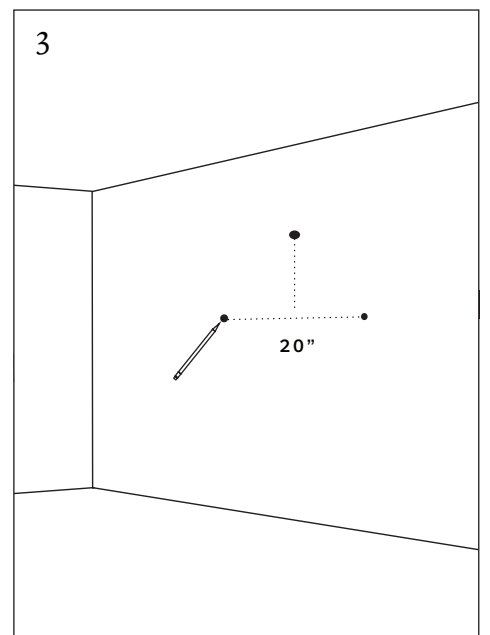

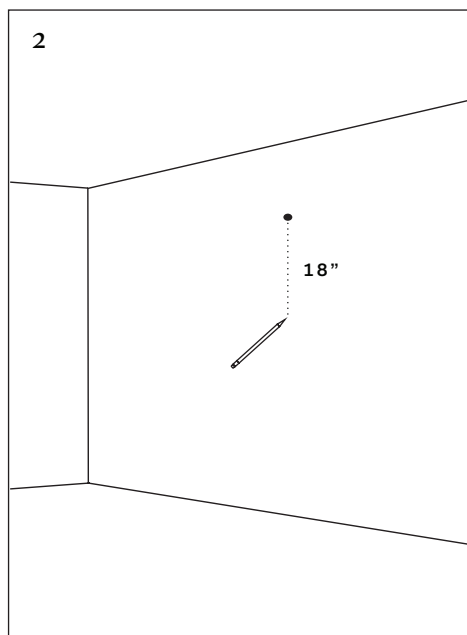

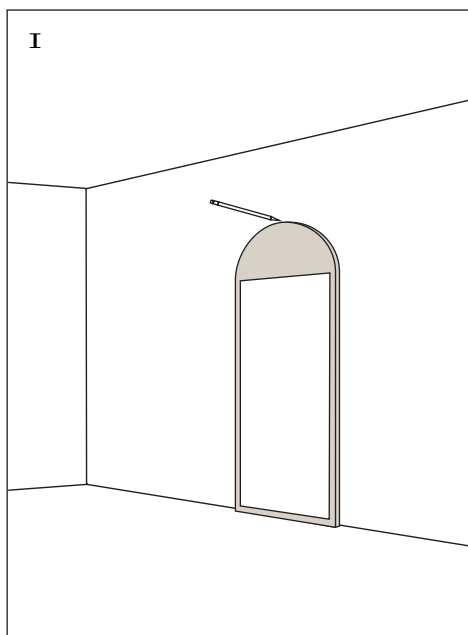

+ Power drill + Drill bits + Screwdriver bits + Level

Having an issue? Call us at 917.664.4483

INSTALLING YOUR JUNE FLOOR MIRROR:

1. Position the June Floor Mirror in the desired location. Mark the center of the arch on the wall.
2. From that mark draw a straight line down 18".
3. From the bottom of vertical line you just made, draw a horizontal line approximately 20" wide. To ensure the mirror hangs straight, please use a level.

INSTALLING YOUR JUNE FLOOR MIRROR:

4- Take the clasp and place the grooved side flat against the wall so that it is aligned and centered with the horizontal line from step 3. Check positioning with a level and mark the holes of the clasp with a pencil.

5- Screw the clasp on to the wall. Then using the corresponding clasp on the back of the mirror, slide the mirror clasp onto the wall clasp so that the mirror hangs securely.

Enjoy your new June Floor Mirror!
