

INNOVO IS NOW  
ELIGIBLE FOR  
MEDICARE  
REIMBURSEMENT

Safe, effective and FDA cleared, INNOVO is the **truly non-invasive** solution for Stress Urinary Incontinence (SUI).

It is a perfect alternative for patients suffering from bladder leaks that are looking for an at-home solution that does not involve probes or internal sensors.

Using unique Multipath technology (powered by NMES), INNOVO targets the weakened pelvic floor muscles, delivering 180 perfect and complete pelvic floor contractions over each 30 minute session.

In clinical studies guided by the FDA, **87%** of women who used INNOVO were dry or nearly dry in 12 weeks or less and **80%** of women saw significant results in just 4 weeks. In these studies, INNOVO specifically enrolled women who had previously failed pelvic floor physical therapy.
