

Dilution Chart for Hypercaloric Formulas

FOR HEALTH CARE PROFESSIONAL USE ONLY

Hypercaloric formulas (above 20kcal/fl oz) should only be used under medical guidance and supervision; additional monitoring recommended.

Standard dilution is one level unpacked scoop of powder for each 60ml (2 fl oz) of water. See product label for detailed preparation instructions.

DILUTION CHART BY SCOOP			
KCALS DESIRED PER FL OZ	UNPACKED LEVEL SCOOP(S)*	WATER (ml)	APPROXIMATE FORMULA YIELD (ml)**
20	1	60	67
22	1	54	61
24	1	48	55
27	1	42	49

* Use only the scoop provided ** Values are approximate

One scoop of ByHeart Whole Nutrition Infant Formula displaces approximately 7ml or 0.2 fl oz water.

DILUTION CHART BY GRAMS						
DESIRED KCALS /FL OZ	FINAL VOLUME (ml)	120	240	480	960	1000
20	POWDER (g)	15.5	30.9	61.8	123.7	128.8
	WATER (ml)	107.6	215.3	430.5	861.1	896.9
22	POWDER (g)	17.0	34.0	68.0	136.0	141.7
	WATER (ml)	106.4	212.8	425.6	851.2	886.6
24	POWDER (g)	18.6	37.1	74.2	148.4	154.6
	WATER (ml)	105.2	210.3	420.6	841.3	876.3
27	POWDER (g)	20.9	41.7	83.5	167.0	173.9
	WATER (ml)	103.3	206.6	413.2	826.4	860.9

ByHeart Whole Nutrition Infant Formula powder provides 5.25kcal/g.
