

POLYDOCK

PRODUCTS

Founded in the heart of lakes country, Minnesota, where we still call home, PolyDock Products tested the limits of what a floating dock could be.

Each year, our team at PolyDock Products strives to improve our products to deliver PolyDock customers a world-class dock, unlike anything else on the water. Our products are handcrafted by skilled men and women who take pride in building docks and ports. Products that allow you to make enjoyable lifelong memories with family and friends for years to come.

Our league of professional and experienced dealers will assist you with your dream waterfront, using PolyDock Products.

We look forward to welcoming you into our family or congratulating you on another PolyDock purchase.

WHY CHOOSE POLYDOCK PRODUCTS?

When you choose a PolyDock floating dock system, you get a dock system that can enhance your shoreline's appearance. Its integral brick patterned surface fits well with nearly any waterfront property and contributes to the overall stability of the dock system. PolyDock is designed to require minimal maintenance, so your dock not only looks great but saves time as well. Spend more time enjoying the waterfront and less time and money staining, painting, and replacing dock boards.

PREMIUM STABILITY

The secret to PolyDock's strength and stability is the connectors that allow the entire dock system to act in unison. When you walk on a PolyDock dock system, you'll notice that the whole layout feels very firm and rigid.

EASY TO OWN

Thank to minimal maintenance requirements, you'll quickly discover how easy PolyDock and ShorePort ownership is—no more replacing warped boards or frayed lift cables.

EASY ON YOUR FEET

The safe, slip-resistant, attractive design of PolyDock and ShorePort are easy on your feet and designed to look great while complimenting nearly any waterfront environment.

EASY INSTALLATION

Whether you are installing PolyDock by yourself or having it installed, PolyDock Products use easy to follow instructions. A typical docks system can be installed in just a few hours by a couple of people.

GREAT DURABILITY

We've been manufacturing rotationally Molded PolyDock and ShorePorts since 1998, and many of those first dock sections and ShorePorts are still in use today.

ENDLESS VERSATILITY

With PolyDock Products, you can create nearly any layout for a perfect residential, commercial, or municipal waterfront environment.

POLYDOCK MODULAR FLOATING DOCKS

BETTER WITH EVERY STEP

FIRM WALKING SURFACE

The attractive herringbone brick pattern is supported underneath by hundreds of kiss-offs that create an incredibly firm, non-spongy walking surface.

PREMIUM STABILITY

PolyDock offers superior stability that you'll feel throughout the entire dock system. You'll instantly notice that each part of the PolyDock system works in unison, from the dock sections to the connectors, to the pipe brackets to provide superior stability.

EASY TO OWN

A PolyDock system provides you with minimal maintenance, so you'll never need to paint, stain or replace warped dock boards again. And because it's a floating dock, you won't need to adjust your dock height due to continually changing water levels.

Available in Tan and Gray

CONFIGURATION EXAMPLES

POLYDOCK ACCESSORIES

QUICKLY CUSTOMIZE YOUR POLYDOCK

THE INDUSTRY'S MOST ACCESSORIES

Add, remove, or reconfigure your dock accessories at a moment's notice with PolyDock's easy-to-use Accessory Connectors. Lightweight aluminum connectors and brackets provides superior strength and durability, while stainless steel and brass hardware won't rust or corrode. When you choose a PolyDock floating dock system, you'll enjoy the convenience of being able to quickly and easily reconfigure your dock accessories.

LADDERS

Get in and out of the water quickly with Pivoting Ladders. Our ladder can be mounted anywhere along the dock frame to accommodate your dock and slip setup. A vertical pivoting action and locking pin allow you to flip the ladder up when you're not using it. At the same time, standard handrails on the steps provides safe, stable usage and entry. All-aluminum construction means hassle-free ownership.

KASHTON DOCK FURNITURE

OFF-DECK

Our Kashton furniture offers a simple yet versatile design and an all-aluminum construction for a genuinely unique dock furniture experience. The swivel rocker mechanism provides comfort and function in all climates. Available in five fabric options (chairs and umbrella coordinate), you get furniture that matches your waterfront space's unique style. Kashton furniture is available as a set (two chairs, table, and umbrella) or individual pieces.

DUAL STAND-UP PADDLEBOARD RACK

The PolyDock stand-up paddleboard rack offers easy installation and seamless protection for our paddleboards. Its simple, intuitive design makes your paddleboard more accessible, meaning you'll have more time to use them and less hassle storing.

WATERSPORTS RACK

Add the PaddleSports Rack to easily store your kayak, paddleboard, or canoe on the dock so it will be ready for the water when you are. The PaddleSports Rack is constructed of aluminum and keeps your gear up and off the pier to maximize your dock space.

STANDARD DOCK FURNITURE OFF-DECK

Featuring sloped armrests, premium quality fabric slings, and all-aluminum construction, our Standard Furniture offers a more economical option without sacrificing quality or comfort. Complete with an ivory frame, beige fabric sling, mesh table, and tan umbrella.

DOCKSIDE GRILL

WHEEL CADDY

WATERCRAFT ENTRY ASSISTANT

FISHING ROD HOLDER

FLAGPOLE AND UMBRELLA HOLDER

POWER PEDESTAL MOUNT

Add the convenience and functionality of power pedestal to your dock system marina with the Power Pedestal Mount Brackets from PolyDock Products. The Power Pedestal Mount connects to the side of PolyDock for a top mount pedestal installation.

DOCK BUMPERS

Vertical dock bumpers install easily, and can be quickly adjusted up or down to provide you with the perfect level of protection for your watercraft. An adapter kit is available to allow you to install the dock bumpers horizontally if desired. *Available colors include: Blue, White, Tan, and Black.*

LAKEVIEW BENCH

OFF-DECK

The Lakeview bench is an excellent addition to your PolyDock system. They feature an aluminum frame and an ergonomic, rotationally molded seat and backrest for comfort. Optional armrests with cup holders are available for additional convenience.

SHOREPORT

DRIVE-ON PWC PLATFORM

ADVENTURE IS MERELY A FEW STEPS AWAY.

FASTER LOADING AND LAUNCHING

ShorePort is built to get you on and off of the water faster than a traditional standing, PWClift. Push off to launch, and drive on to load. With ShorePort, your next adventure is only a few steps away.

EASIER TO OWN

ShorePort has fewer moving parts than a traditional PWClift and fewer rollers than other drive-on PWC storage platforms. Fewer components make ShorePort easier to maintain; plus, the ShorePort design has been in use for nearly two decades, so its durability is time-tested.

Two mid-section rollers are adjustable to accommodate virtually any PWC or jetski hull style while the rear roller makes for easy transitions from the water to storage on the ShorePort.

CAPACITY	LENGTH	WIDTH	WEIGHT
1,150lbs-1,450lbs*	138"	58"	260 lbs

Available in Tan or Gray

HYDROPORT® SERIES

FAST, CONVENIENT ACCESS TO THE WATER

PEACE OF MIND ALL THE TIME

Easy on—Easy off means quicker access to the water. No more trailering. No more boat ramps. No more hull cleaning. It's that easy.

SAFE AND SECURE EXTENDED STORAGE

The HydroPort's exclusive bow bumpers slows your craft's forward motion and provides a soft rest for the keel. Plus, the molded-in tie-down offers an easy solution for extended out-of-the-water PWC storage.

MULTIPLE ANCHORAGE AND CONNECTION OPTIONS

Built for today's larger PWC units, the HydroPort utilizes a front- or side-mount connection for free-standing, standing dock and floating dock applications. Stainless steel roller axles for increased strength and compatibility with fresh, brackish, and saltwater.

AVAILABLE IN THREE COLORS:

HYDROPORT® SERIES

The HP EPIC™ has the widest anti-skid walkways in our HydroPort Series fleet of ports. The latest entry design has the most comfortable load and launch of any PWC docking platform on the market. Our anti-slip walking surface provides the safest access around your craft. The HydroPort EPIC accommodates the increase in size and capacity of today's PWCs. The EPIC provides stable access, easy cleaning, fast covering, deters intake fouling associated with marine growth, and protects your PWC against rough waters.

The HydroPort Extreme is a marine foam-filled port for increased strength. Its fully roller-supported width and placement are easily adjustable to accommodate different PWC models. Our exclusive "airpillow" bow stop and flat anti-skid walking surfaces provide easy loading and launching.

KAYAK LAUNCH FOR SHOREPORT

THE BEST WAY TO LOAD AND LAUNCH YOUR KAYAK OR CANOE

Turn your dock system into a true “home base” for all of your adventures with the Kayak Launch for ShorePort from PolyDock Products.

STAND ALONE KAYAK LAUNCH

The Standalone Kayak Launch is designed to allow for a standalone kayak or canoe launch system. Requiring only a ShorePort, the Kayak launch rails, and the proper anchorage options such as pipe brackets, chain guides, or stiff arms for installation. Additional dock sections can also be added to allow for more dock space and improved stability.

POLYDOCK KAYAK LAUNCH

The PolyDock Kayak Launch is designed to allow a parallel connection to the 10' side of a PolyDock floating dock section. A perfect layout for those interested in creating additional dock space. This version requires a 4x10 or 5x10 PolyDock section, ShorePort, the kayak launch rails, and proper anchorage options such as pipe brackets, chain guides, or stiff arms.

RAMPS & GANGWAYS

A TRANSITION FOR EVERY SHORELINE

WIDE SELECTIONS

Choose from a wide range of ramps and gangways available in various widths and lengths to accommodate nearly any application. Gangways feature handrails for safety and strength. Ramps are available in two styles and multiple sizes – 4'x4', 4'x8', and 6'x8' to fit your transition requirements.

MAXIMUM DURABILITY

We've been welding aluminum for over 40 years, so our durability and experience is unmatched. Ramps and gangways from PolyDock Products are constructed of high-quality aluminum. They are precision welded to provide you with an attractive and long-lasting transition between your shore and your docks system. Decking choices vary by product and include Cedar, Glacier, and Aluminum tread panels.

EASY CONNECTIONS

All PolyDock ramps and gangways can be installed using hinges and rollers to allow your ramp or gangway to hinge at the shore, at the dock. All PolyDock ramp and gangway connections feature durable stainless steel and brass mounting hardware for easy installation and durability.

10 PREMIUM DECKING OPTIONS

With ten different decking options to choose you can create a completely unique system to match your home or cabin. Visit PolyDockProducts.com to learn more.

For specifications on ramps and gangways, see page 27

DOCK CONNECTORS

STRENGTH. SIMPLICITY. FLEXIBILITY.

COMPLETE DOCK STABILITY

The PolyDock Products Dock Connectors are an integral part of the PolyDock Products Dock Stability System. The length of each dock section and the PolyDock Connectors' strength act to distribute wave energy throughout the entire dock system. These connectors give you a firm, flat deck surface that remains incredibly stable in a wider range of weather and wave conditions.

TOP AND BOTTOM COMPOSITE MATERIAL

The top and bottom of the PolyDock Connector are manufactured from high-density polyethylene. Each Connector spans the full length or width to provide a more durable and secure connection and improved dock system stability.

COMPOSITE CONNECTOR RODS

Each PolyDock Connector uses ultra-durable composite connector rods to secure the top and bottom pieces of the Connector together. The composite connector rods are designed to be incredibly durable and remain tight.

CONNECTOR HARDWARE

In addition to the composite rods, all connector hardware is corrosion-resistant stainless steel. It provides an easy to install and long-lasting dock to dock connection system.

Diagram of PolyDock dock system Energy Transfer (represented by the arrows) in reaction to wave action (represented by the blue line).

ANCHORING OPTIONS

SIMPLE. QUICK. DURABLE.

Pipe Augers: Allows anchorage pipe to be augered into the lake, river, or ocean bottom. Fits 2" I.D. pipe. Pipe sold separately.

Large Pipe Bracket: Holds dock system and Shore Ports in place when used with 2" schedule 40 galvanized pipe (sold separately). Allows the system to remain in place while adjusting for water fluctuation.

Heavy Duty Pipe Bracket With Chain Guide: Allows anchorage of the dock in deep water or firm lake bottoms.

Light Duty Pipe Bracket: A light duty pipe bracket perfect for small dock layouts in calm waters such as farm ponds.

Shore Port Rear Pipe Bracket: Attaches to the rear of the Shore Port to provide additional stability to single or multiple Shore Port installations.

Stand Off Bracket (Pair): Provides additional support for connecting Poly Dock or Shore Port offset from standing docks.

Pile Hoops: Available in 8", 10", and 12" sizes to fit a wider range of piling installations. Includes roller system for smooth operation.

Heavy Duty Stiff Arm: Anchors your dock or Shore Port to a seawall, deck, post or other abutment on shore. Galvanized pipes sold separately.

Light Duty Stiff Arm: Anchors your dock or Shore Port to a seawall, deck, post or other abutment on shore. Perfect for light duty, calm water installations. Galvanized pipes sold separately.

Chain Anchor Plate: Allows you to anchor your dock system with chains affixed to dead-weights. Perfect for deep and firm water front locations. Connects with 6" Accessory Connector, sold separately.

Flexi-Hinge (Pair): Flexible attachment for connecting Shore Port to traditional wood or metal floating docks. For perpendicular, or front mount only.

Flexi-Hinge Parallel Mount: Used for attaching a Shore Port along side a traditional wood or metal floating dock. For parallel mount only.
