eMeetLink User Manual

EMEET SmartCam C960/C980 Pro

Device settings

Firstly, connect the device to the computer via USB cable. Open the eMeetLink software and enter the setting interface.

1. Video settings

(1) Anti-flicker

Most countries use 50HZ as the power grid operating frequency, and some countries such as the United States use 60HZ.

Choose a suitable power frequency to avoid the screen flashing.

(2) Image parameters

You can drag the slider to adjust the image parameters like brightness, contrast, sharpness, saturation, and white balance according to your needs.

(3) White Balance

You can click the "Auto" button to open or close the white balance auto adjustment function.

When the auto button shows blue, the white balance of the image will be adjusted automatically.

When the auto button shows grey, you can adjust the white balance according to your needs.

(4) Restore Default Settings

After restoring default settings, all operating settings will be restored to the factory mode.
