### SECTION TEN: STABILITY AND REACTIVITY

|                           |                                 |
|---------------------------|---------------------------------|
| Conditions to Avoid:      | Maintain integrity of packaging |
| Materials to Avoid:       | Not Established                 |
| Shelf Life:               | 18 months                       |
| Shelf Life after opening: | 18 months                       |

### SECTION ELEVEN: TOXICOLOGICAL INFORMATION

This product has been formulated for use as a topical cosmetic product. Use of this product as directed on the label is not expected to result in toxic effects.

### SECTION TWELVE: ECOLOGICAL INFORMATION

Ingredients used in this product are not known to be direct ecological pollutants. In order to minimise long term global pollution consideration should be given to:

- Reduction in consumption of disposable products and packaging.
- Participation in recycling activities

### SECTION THIRTEEN: DISPOSAL CONSIDERATIONS

This product has been manufactured for consumer use. Product is normally rinsed to drains as routine personal hygiene practice. The packaging can be disposed as standard household waste, although sorting and appropriate recycling of packaging materials is encouraged.

### SECTION FOURTEEN: TRANSPORT INFORMATION

**Road and Rail Transport:** Not DG according to ADG

**Air Transport:** Not DG according to IATA

**Sea Transport:** Not DG according to IMDG

### SECTION FIFTEEN: REGULATORY INFORMATION

This Product is manufactured in Australia, under Australian Law. The following federal regulatory bodies are the source of reference information.

### **SECTION SIXTEEN: OTHER INFORMATION**

#### **Disclaimer**

This SDS has been prepared according to Work Safe guidelines and with reference to the best available information at the time of preparation. Since we are unable to control and/or anticipate all conditions under which the product may be used, each user must review this SDS and assess it in the context of their circumstances in order to determine the most appropriate usage and handling procedures for their situation. If clarification or further information is needed to ensure that an appropriate assessment can be made, then the user should contact the manufacturer.

#### **Allergies**

There is always a possibility of an individual being allergic to one or several ingredients within a product. A low irritant claim does not infer that susceptible individuals will not react adversely. Allergies are very much a personal condition and do not in any way indicate a fault with the formula or substances involved. Natural substances particularly are vulnerable to seasonal and other variations that may contribute to unanticipated reactions. Unfortunately, often the only remedy in these situations is to ascertain the exact cause of the reaction (typically with professional medical help) and then to avoid all future exposure.

#### **Animal Products**

Suitable for vegetarians

#### **Document Revision**

Revision will be carried out every 5 years as required by Work Health and Safety (WH&S) Regulations
