

72 Volt DC 1500W Electric Heater Replacement Kit

Product Features

Installation:	Various Options Available
Self Regulating:	Increases resistance with increasing temperature to prevent overheating
Small Form Factor:	Compact size is easy to install in place of original heater core
Standardized Size:	Covers a wide range of voltages
Construction:	Plastic Frame provide electrical isolation to prevent short circuit to mounting components

Overview

The CanEv 72 Volt Heater Element & Contactor Kit provides the necessary components to replace the traditional heater core of an ICE vehicle. The powerful 1500-Watt element is available in various input voltage options.

The Kit includes both Element and the Kilovac LEV100 Contactor. (900V ~ 100A with 12V coil)

Specifications

Min / Max Voltage Range:	36 ~ 90 Volt DC
Power:	1500W +5/-10% 3.3m/sec 25±2°C
Inrush Current:
