I'm a bit nervous of trying tren for the first time. All I have is Tren E at 200mg/ CC. I'm wondering if 200mg/week is enough if taken with 100mg of Test C. I've read about side effects on tren and I suffer from nasty anxiety and panic attacks already. My strongest cycles have been nothing but 500mg of test (sometimes sustanon, which is of course test).
