## LESSON #1

### Introduction: Key Vocabulary

#### Lesson Overview:

Students will become familiar with the keywords used during this unit through a partner-matching activity.

#### Materials Needed:

- Words and Definitions sheet (two pages)
- Scissors and glue
- Vocabulary cards

## LESSON PLANS

- Teaching Procedure:
- This lesson is designed for pairs.
1. Hand out the vocabulary cards to each student.
  2. Have students work in pairs to match the words with their definitions.
  3. Have the groups walk around the classroom and find the vocabulary sheets. Students need to scan the QR code with technology to uncover the mystery word. Once they have discovered the mystery word, have them write it on the vocabulary graphic organizer. If your class does not have access to technology, hang up the non-QR code sheets and have students use a dictionary or glossary to find the definitions.
  4. Once students have scanned each word, have them use the "Words and Definitions" sheets to match up the words with their definitions.
  5. Each student cuts out their own words and definitions.
  6. Wait to give students glue until you have taken up the answers as a class.
  7. Take up the answers as a class.
  8. Then, give students time to glue their vocabulary words and definitions on the page.

## PEACEKEEPING AROUND THE WORLD

Canadians are famous for helping to keep peace in the world. A Canadian named Lester B. Pearson came up with the idea of sending groups of trained people to other countries to help stop fighting and keep the peace.

He thought of this idea when he was working for the **United Nations** and the Canadian government in the 1950s.

The soldiers not only stop the fighting but also help give food and medicine to people in need. They also protect regular people, aid workers, and diplomats.

The first time peacekeepers were sent was during a problem with a canal in Egypt. Many countries were worried because they needed the canal for shipping. Pearson suggested that the United Nations

invented then, after at

talking many French, languages.

Canadian peacekeepers have helped in many countries around the world.

## THE NORTH ATLANTIC TREATY ORGANIZATION (NATO)

The North Atlantic Treaty Organization was created in 1945 after World War II by 12 countries, including Canada, to keep everyone safe.

The main goal of NATO is to cooperate and agree on a common defense. Article 5, says that if one member is attacked, it is like an attack on all of them. This rule was put into action after the terrorist attacks on September 11, 2001, that occurred in the United States of America.

Canada is in a good position for defence because it is next to three oceans. Canada is a peaceful country, and it helps other NATO countries by joining in peacekeeping missions and giving aid to people who need it.

**Political Impact:** How does it affect the government?

**Social Impact:** How does it affect the people?

# PLASTICS IN THE OCEAN INQUIRY

**Economic Impact:** How does it affect the local and global economy?

**Environmental Impact:** How does it affect the environment?

Plastic waste in the ocean can have a big impact on Canada's environment. When plastic waste enters the ocean, it poses a threat to marine animals and ecosystems.

Canada has recognized this problem and has taken steps to address it. One specific example is the ban on single-use plastics, such as straws and plastic bags. Additionally, Canada has invested in research and technology to improve waste management and recycling systems. These efforts hope to reduce plastic pollution and protect the country's coastal areas.

The impact of plastics in the ocean also extends to Canada's economy. Coastal tourism, which contributes to the economy, can be negatively impacted by plastic pollution. By addressing this issue, Canada aims to preserve its natural resources and promote sustainable economic growth.
