WHAT'S INSIDE?

INTRODUCTION

Find The Greek Root

Lesson Overview: Students will move around the classroom to find different Greek roots.

Materials Needed:

- ❑ Student technology, e.g. cellphones, iPads
- ❑ Photocopy a class set of:
- Greek Root sheets (QR Code or Non-QR Code option)
- G
- G
- D

Tea

1. H way using the QR code or non-QR code format.
2. Divide the class into pairs or groups of 4.
3. Have students walk around the classroom or hallway and find the Greek Root sheets. Students need to scan the QR code with their devices to uncover the Greek root. Once they have uncovered the Greek root, have them write it on the Greek Roots Scavenger Hunt graphic organizer.
4. Once students have completed this activity, have the pairs or groups work together on the Greek Roots Matching Activity.
5. Take up the answers as a class.
6. Have students write the correct meanings next to the Greek roots on the Greek Roots Scavenger Hunt graphic organizer.

ANSWER KEYS

Understanding The English Language (Morphemes)

All words in the English language (and other languages) are broken down into **morphemes**.

Morphemes are the many parts of words or whole words that make up a language. They are like the simplest **building blocks** of our language.

Examples:

- There are 3 morphemes in the word "untruthful": "un–," "truth," and "–ful."
- In the word "guided," there are 2 morphemes: "guide" and "–d." The word "guide" is the root, and "–d" is an affix, which tells us when the word "guide" is taking place (in this case, past tense).

Understanding Roots Or Bases

Or, roots can be **fully** or **bound**. Fully roots can stand on their own. For example, the word "sun" is a fully root because it can be a complete word. Bound roots cannot stand on their own. For example, the Latin root "–ceive" means "receive" or "get" and cannot stand on its own because it needs to be a complete word.

ROOTS AND AFFIXES NOTES

Understanding The English Language (Morphemes)

All words in the English language (and other languages) are broken down into _____.

Morphemes are the many parts of words or whole words that make up a language. They are like the simplest _____ _____ of our language.

Examples:

- There are 3 morphemes in the word "untruthful": "un–," "truth," and "–ful."
- In the word "guided," there are 2 morphemes: "guide" and "–d." The word "guide" is the root, and "–d" is an affix, which tells us when the word "guide" is taking place (in this case, past tense).

[illegible] is the root, but it cannot stand on its own. The meaning of the Latin root "–ceive" is to get or take.
