XOXOO HELPS CLIENTS TACKLE TOUGH DISPLAY NEEDS

It's difficult to find the right product that fits all the needs when creating displays for unique environments. That's the inspiration behind XoXoo's modular solutions.

Based on research and a full understanding of the AV industry, we offer mounts with **practical features, quality construction and at affordable prices.**

FEATURES

Specific & Professional

LUMI provides the exact mounting components for nearly every application, from single, dual or an entire wall of video displays, we offer the components that match the need.

Standard Straight Poles

Creating Tiled Display Patterns using Standard Straight Poles (which are popular in the market) may lead to safety problems as the displays will tend to tilt as time goes by causing display

Poles with Weight-Balancing

When using Poles with a Weight-Balancing feature, long term

Standard Straight Poles

Standard Straight Poles are ideal for single row of displays.

The Weight-Balancing System

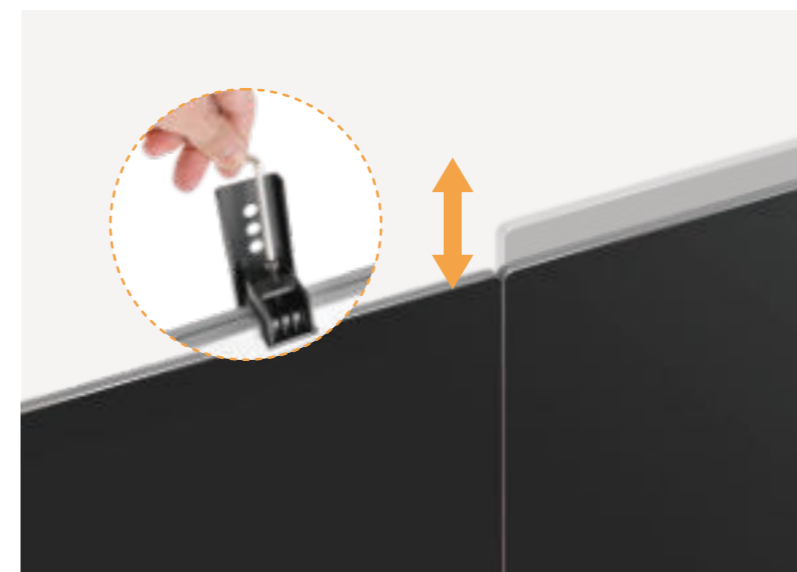

Modular Design

creates endless configurations for most any environment

Easy Installation

The reinforced ceiling plate offers a solid foundation for the pole and contains keyhole slots that provide quick slide-on and screw-in installation.

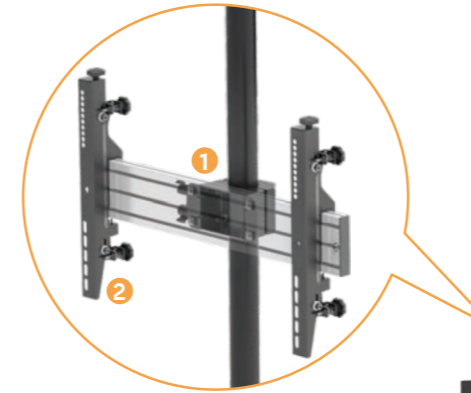

Precise Leveling

each bracket offers micro-height adjustments to ensure displays are perfectly aligned resulting in a nearly seamless appearance.

Basic Installation Overview for Ceiling Mounts

The following information provides an overview of the necessary components required to install a ceiling mount.

- 1 Collar**
Joins rails to the poles
- 2 Brackets**
Choose from Fixed, Tilt and Micro-Adjustment Brackets
For More Details - See Page D10
- 3 Ceiling Plate**
- 4 Poles**
Choose from Weight-Balanced or Standard Pole
For More Details - See Page D07
- 5 Aluminum Rails**
