

Digital Thermometer

Model: 8802

Waterproof (IP67) HACCP Type K Thermometer

Rugged versatile fast response Standard Type K Digital thermometer. This model may be used for dishwasher temps by placing the probe into basket of dishwasher (usually secure with a 'twist tie') & set the 8802 unit on max hold). This unit has a replaceable, plug in probe and can be fitted with different probes for different uses. Wide temperature measuring range. Green & Red dual colour back light on the display to indicate temp hazards. Green back-light indicates temperature is OK & Red back-light indicates that temperature is in danger zone for foods. Comes with: 1 x stainless steel probe, stainless steel probe holder, battery & manual. Type K probes are plug in, easy and low cost to replace if damaged (all waterproof).
