

Temperature Data Logger - Single Use

Model: AZ88181

Single Use Temperature Data Logger

Record time and temperature for any perishables - eg: fruit & veg, meat, meals, vaccines; Any temperature sensitive product. Completely programmable with start, stop, limits, start / stop delay, sampling intervals, etc. Unit is flat so it fits in any package to record the readings eg: during transit. Large memory capacity. Complete with certificate of conformance and user manual on the logger itself. When logging has finished, plug into a USB port & download the data. Data can then be stored on the computer, printed or even left on the AZ88181 as it then becomes a USB stick with your data on it for storage. Sold in packs of 10.

Includes calibration certificate.
