

Large Digital Thermometer

Model: 8891

Waterproof (IP67) Digital Thermometer

This is a **waterproof** thermometer (IP67) which may be hand held or mounted in a suitable position for temperature measurements.

The display is Super Large & LCD so that it may be easily read from a distance and can be wall mounted. The plug-in & replaceable, heavy duty probe is 500mm long and equipped with a sliding, stainless steel clip. The clip is rounded so that it is capable of attaching to many different types and shapes of vessel. The clip may be attached to the side of a vessel so that the probe can slide down and into the liquid for temperature measurements to be completed, or the clip may be removed so that the probe can be 'hand held' in the liquid to check temperatures. Very heavy duty & very versatile thermometer and probe kit.

SPECIFICATIONS

Temp Range	- 10°C to +100°C
Probe	500mm Stainless steel 5mm dia
Accuracy	± 1.0°C
Dimensions	(LxWxT) 122 x 85 x 30mm
Operating Temp	0 to 50°C
Probe Handle Length	65mm. Resistance to 100°C
Cable Length	1500mm. Resistance to 150°C
Probe Clip	15mm x 18mm
Battery	4 x AAA (included)
