

# Identifies Poorly Ventilated Areas for COVID Safety CO2 , Humidity, Temp. Monitor

Model: 7729

## Air Quality Monitor for indoor use

This CO2 Monitor is an accurate, fast and easy-to-use indoor air quality monitor.

Detecting the presence of CO2 in ambient air helps users to take care of indoor air quality.

Along with providing an alarm when hazardous levels are reached, this monitor provides ambient temperature and relative humidity of the area.

- Large LED display with light bar to provide easy reading from a long distance.
- 3 colour indicator (green/ yellow/ red) changes with CO2 concentration.
- Buzzer alarm function with mute or disable.
- Easy to calibrate.
- Wall mount or desktop setup.
- No setup required.

## Large Wall Display

## Programmable with light bar indicator

## SPECIFICATIONS

CO2 Range	0~9999 ppm
Temperature	-10~60°C (14~140°F)
Humidity	0.1~99.9% RH
Resolution	1ppm, 0.1°C, 1% RH
CO2 Response	< 30 seconds
Power Supply	Mains Adaptor 2m lead
Size	226 x 152 x 45 mm
