High Accuracy Thermometer for In-House Calibrations
## Model: Calibration Kit

Laser And Probe Calibration Check Kit

This kit has been produced to enable quick and effective on site calibration checking of Infra-red and probe thermometers. The Kit includes everything you need to ensure your equipment is reading appropriately.

- RTD Type thermometer, Highly Accurate
- Calibration Cup for Probe & Infra-Red Calibrations
- Supplied with 1 x Food Grade Stainless Steel Spear Type Probe PT100
- Includes all instructions
- 12 months Certificate of Calibration
- Hard carry case included

Features:
- Data Hold
- Max. Probe Diameter for Calibration Cup is 4.5mm
- Large backlit display-Green/Red dual colour to indicate temp hazards
- Serial Numbered

Red back-light (temps between 4ºC & 60ºC)

Green back-light (temps below 4ºC or above 60ºC)

SPECIFICATIONS	
Waterproof	IP67
Temp range	-100°C up to +300°C (with appropriate probe)
Accuracy	±0.15°C
Resolution	0.01°C
Data update	1 second time intervals
Probe	150mm RTD food grade stainless steel Max 300°C
Cable	1 meter
