

# Coffee Thermometers

Model: Coffee Stick

## Coffee thermometer

This is a great & highly sought after coffee thermometer to make perfect frothy milk for coffee varieties. There are also tips from a top barista on making the perfect coffee on the back of the pack! The dial is not marked for various milk types so that it can be used in more applications. It is also marked in degrees Fahrenheit as requested by many customers. A coffee thermometer used correctly will give the consistency needed in a café or restaurant producing coffee varieties. When a customer receives a creamy coffee, they will come back again and again to receive the same consistently GREAT cuppa!

Dial increments in 2°F

**The perfect temperature tool for the professional and the home coffee barista alike - and at a very attractive price!**
