

# HLP New Product Information Sheet.

## Easy Log

### Model Easy Log

This is the first data logger that has been designed specifically for the requirements for food safety at a price that anyone can afford. This logger comes in a HANG PACK with colour print and contains everything you need to get it working.

The pack contains the logger with a temperature range of -40 to Plus 70 C, the interface unit to the computer, ( USB) and the full software package. The data loggers has 8000 points of memory and can be set up to take a reading of the temperature every 1 second up to 2 hours ( 10-30 Minutes is enough). Then just download ( Just a 5 minute job) every month to create a permanent record of your fridge and freezer temps. Make sure that you check the records every time to ensure the temp is correct before you file them. The logger can be set so that the RED led will flash if the temps are not right, that way you can be alerted straight away.

**HACCP OK**
