

Fridge / Freezer Temp Display

Model: Fridge Temp

Digital Temperature Display with Wired Temp Sensor

The Fridge Temp is an extremely versatile digital display thermometer with a temperature sensor on external cable.

This unit can be used to monitor & display the temperature of fridges or freezers, or ambient room or outside temperature.

Featuring a Max/Min (maximum & minimum) memory the Fridge Temp can be used to check on storage temperature of items overnight or over the weekend. Perfect for food fridges and freezers, in retail, wholesale, aged care, school canteens, child care, etc. Loud audible alarm.
