Probe folds out 180°

Food grade Infra-Red & Probe Thermometer

This innovative new dual function HACCP certified thermometer has an infra red and a probe thermometer in one unit. This small waterproof pocket sized tool even tells you when the temperature is within the HACCP temperature rules by showing a green light for good and a red light for incorrect temperature. Meets and exceeds the Australian food standard requirements. The waterproof design ensures that these units last the distance around food handlers. This probe puts food safety within reach of everyone. Café, restaurants, take away, service stations delivery drives etc.

Also suitable for forehead / fever testing
