

# Infra-Red And Probe Thermometer

Model: HACCP-DUAL

## Food grade Infra-Red & Probe Thermometer

- This innovative dual function HACCP certified thermometer has an infra red and a probe thermometer in one unit.
- This small waterproof pocket sized tool even tells you when the temperature is within the HACCP temperature rules by showing a green light for good and a red light for incorrect temperature.
- Meets and exceeds the Australian food standard requirements. Serial numbered to help control the traceability of the unit.
- The waterproof design ensures that these units last the distance around food handlers.
- This probe puts food safety within reach of everyone.
- Café, restaurants, take away, service stations, delivery drives etc.
