

Temperature Sensor

Model: Medi Temp

Medical Temperature Meter with Inside/Outside Temp

The Medi-Temp is an extremely versatile digital display thermometer with 2 temperature sensors.

This unit can be used to monitor & display the temperatures of 2 x fridges, or a fridge & a freezer, or room temperature, or room and outside temperatures. Featuring a Max/Min (maximum & minimum) memory the Medi-Temp can be used to check on storage temperatures of items overnight or over the weekend. Perfect for food monitoring, medical, vaccine & blood fridges, etc.
