

New Product Information Sheet.

Model: PLA-T2T: Perfectea - Tea Thermometer

The temperature at which you brew your tea is important. Too high a temperature and delicate leaves may burn and give a bitter flavour to your tea.

This Perfectea thermometer will help you to ensure your tea is perfect every time!

Place the probe of this very stylish Perfectea Tea Thermometer either into the spout of the tea pot or remove the lid of the pot & use the thermometer clip or the universal plate to place the thermometer probe into the tea pot (or into the bottom of the diffuser in the pot). If brewing your favourite tea directly in your cup, place the Perfectea straight into your tea cup.

The end of the probe must be at least 5cm or more into the water.

Use the markings on the dial to ensure that your tea is brewing at the correct temperature.

Once suitably brewed, wait for the temperature to reduce to below 65°C before drinking your refreshing, relaxing cuppa.

Black & Herbal Teas should brew at 97 - 100°C (use boiling water). Brew a tea bag for 2-3 minutes or leaf in a pot up to 7.

Oolong Tea should brew at 84 - 88°C so if using freshly boiled water, either cool it in your jug or put some cold water onto the leaves before adding the hot. Steep up to 5 minutes.

White & Green Teas require 76 - 84°C Steep 2-3min in a pot

All hot drinks should be consumed below 65°C to ensure safety of your mouth and oesophagus (as per W.H.O. advice).

A comfy temp to drink hot drinks is between 50 - 55°C however this is personal choice (as long as it is below 65).

It's waterproof & dishwasher safe Perfect & very stylish!

Dial detail

Specifications:

- 40mm Dial
- 150mm stainless steel probe
- Probe clip
- Universal plate

Perfect Tea...

Depending on the size of your cup or pot, here are the directions for placement of your Perfectea Tea Thermometer using the plate & clip included.

If Perfectea will not sit in the cup or pot, squeeze the side & top of the clip & push the Perfectea through the two holes. Release & the clip will lock in position for you!

...Every Time!
