

Plumb Guard Plumbing Safety Tester

Model: Plumb Guard V3

Plumb Guard plumbing safety tester with Blue Tooth

- Alerts users if dangerous voltage is detected on the job site;
- Blue Tooth connected;
- Download the “PGSafe” app, then the mobile device becomes a remote alarm on site;
- A mobile phone on site can be alarmed if the Plumb Guard unit alarms, so that the phone holder can alert the Plumb Guard user & other workers on site;
- A mobile phone on site can constantly monitor one Plumb Guard for alarms becoming a second level of monitoring;
- If a worker is working alone or on a remote site, the Plumb Guard app can be set up to send an alert to the Safety Officer or Supervisor with alarm details and the GPS position of the unit;
- A follow-up call can then be made to make sure that the worker is safe & all is well.
- IDEAL for noisy sites or with more than one worker;
- All alarms can be logged with position along with full area mapping of faults which can be stored and displayed on any computer.
- It would be a simple job to check where most alarms are coming from.
- Provides full reporting and logging of all alarm events for history.

The world's FIRST Plumbing Safety Device connected to the Internet

The Next Gen for Plumbing & Electrical Safety
