

TI-1S

Model: TI-1S

Single Use Indicator with communications

TI-1s is a single use indicator for shipment temperatures. Several ranges are available for vaccine use: 2-8°C. Small & easy to use with low cost. No computer is needed. For additional confirmation use the mobile phone to read the shipping data and either print or email. Just break off the start tab and place into a fridge or shipment. When the shipment is received, the unit is removed from the fridge and the stop tab is broken off. Push the read button to show the OK Under or Over temp indication. For more info (say the time the alarms occurred etc) use a mobile phone with the free APP to read from the indicator.

Features:

- Range 2-8°C
- Inbuilt with a 30min delay start
- 1 minute sample time
- Battery life of 2 years
