Digital Probe Thermometer

Model: Tiny Tee

Digital probe thermometer

This probe type thermometer has many features.
The 'T' shape makes it perfect for use in food displays, etc as the probe can be in the product while the display faces the user. Displays temperature to 0.1 degrees C - as required by most HACCP (food safety) systems, pocket style, easy to use, safety cover over the probe, very wide temperature range and low cost.

By keeping the cost down and the features high , this probe puts food safety within reach of everyone.. Café, restaurant, take away, service station, delivery drivers etc. Very popular also for use in frothing milk for latte, cappuccino, etc. The WATERPROOF design ensures that these units last the distance around food handlers.
