Once a man moved into a new house. Soon he realised that he had two blacksmiths as neighbours one on the left and the other on the right. They were a source of big nuisance to him. Day in and day out, the blacksmiths worked with their hammers. They made such thunderous sounds that our man had lost all peace and calmness. He did not know what to do. Finally he decided to put an end to this disturbance. He called the smith on the left, gave him a hundred rupees and requested him to move into another house. The smith agreed and took the money. He promised him that he would move into a new house by next morning. Now the man called the smith on the right and

begged him to move into a new house, and gave him a hundred rupees. The smith obliged and promised to do as he wished. Our man is now very happy. He thought he could get rid of the disturbance and purchase peace for just two hundred rupees. That night he slept happily.

Next morning, he was awakened by the sound of hammers. He was greatly confused. He rushed out to ask the smith why they had not moved into a new house as promised. To his shock and dismay, he found that they did keep their word but in a different way - the smith on the left moved into the house of the smith on the right, the smith on the right had moved into the vacated house of the smith on the left.

Now Answer the following questions.

- 1) Who are the two neighbours of the man?
- 2) They were a source of big nuisance. How ?
- 3) How did the man suffer ?
- 4) What was his plan to put an end to the disturbance ?
