INSTRUCTIONS

 \star The aim of the game \star

Collect five Star Cards, one in each category. The winner is the first to collect one card from each category and then to Log Out.

★ Categories ★

There are six decks of cards - five categories of questions, and ? cards. Shuffle these separately and put next to the board.

ONE-STAR WONDERS	There are always winners and losers – these are the losers.	HISTORICAL HOWLERS	Wild reviews from the days before the internet.
MYSTERY BASKET	What's being described here?	FILL THE BLANKS	Identify the missing words to complete these reviews.
FACTS & STATS	Sort out the truth from the fake news.	?	Follow the instructions on the card, and GOOD LUCK!

★ How to play ★

Each player chooses a playing piece and places them on the Log In square. The youngest player has the first turn and rolls the dice.

If you throw a 1 or a 2, you move your piece that number of spaces. Pieces can be moved in any direction (but must not land back on the square they started on).

The player to your left picks up a question card corresponding to the colour of the space you've landed on, and asks you the question. If you get it right, you keep the card, and place it face-down in front of you. This is the end of your turn, and it is now the turn of the player to your left.

If the dice shows ?, you pick up a ? card and follow its instructions. This is then the end of your turn.

You may have more than one Star Card in a category.

Only one player can occupy a space (except for the Log In or Log Out square).

★ Winning ★

Once you have collected a Star Card in each category, you must make your way to any of the Log Out squares. Once you reach a Log Out square, to win the game you need to answer one question from any category selected by the other players. You can remain on the Log Out square until you answer a question correctly. The first to reach a Log Out square and answer a question correctly wins the game.
