HOW TO PLAY

The dealer takes a card from the deck to have five cards in their hand, then removes one and passes it face down to the player on the left. This player picks it up and discards one card to their left, play continues this way around the table. The last player discards a card to a 'trash' pile.

Players should pick and pass cards as quickly as possible.

AIM OF THE GAME

Be the first to collect four of a kind and take a candy cane!

SET UP

Place the candy canes in the centre of the table. There should be one fewer than the number of people playing. Shuffle the deck of cards and deal four cards to each player, then place the rest of the deck to the right of the dealer, face down.

HOW TO PLAY

(continued) Once a player has collected four of a kind in their hand, they can take a candy cane (sneakily or in a wild free-for-all, it's up to you!) Once a player has taken a candy cane, the rest of the players must take one too. Whoever ends up without a candy cane is out! Players return all their cards and play continues with a new round, removing a candy cane from play each time, until there is only one winner left!
